

LocoTrader

The operating system for disciplined trading

Pre-Seed Investor Deck · 2026

Erick Mafole · Founder & CEO · Dar es Salaam, Tanzania

THE PROBLEM

73% of retail traders lose money. Not because of bad strategy.

73%

of retail traders are net losers¹

¹ FCA Client Assets Report 2024; ESMA MiFID II CFD disclosures

#1

reason: no system, no rules,
no real-time accountability

0

existing tools that ENFORCE discipline
before the trade happens

"Trading journals tell you what went wrong after you've lost the money. That's a seatbelt that only deploys after the crash."

The real problem isn't strategy — it's **execution discipline** and **emotional control**.

THE SOLUTION

Every journal tells you what went wrong yesterday. LocoTrader prevents the mistake today.

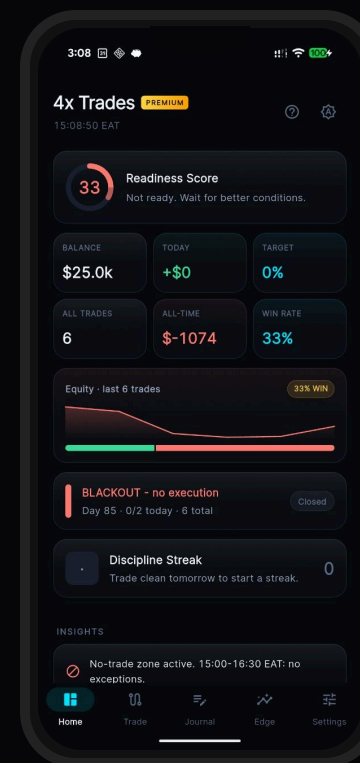

One core innovation: a **self-learning Edge Map** that studies your trades, finds the patterns bleeding you, and blocks the behaviors that cost you money — in real time.

THE CORE: PERSONAL EDGE MAP

After 30 trades, AI learns which symbols bleed you, which hours you lose, which emotional states destroy your edge — and actively warns you before the next mistake. Every trader gets different insights because it's calibrated to *their* data.

Supported by an enforcement layer that makes discipline automatic:

- ◆ **Gate System** — strategy-specific pre-trade checklist that blocks entry until conditions are met
- ◆ **Auto-Lock** — consecutive losses → 24-hour freeze. No override.
- ◆ **Risk Budget** — weekly R-unit cap that forces paper-only at 100%
- ◆ **Drawdown Engine** — prop-firm-aware real-time danger gauges

Dashboard — Readiness Score, Equity, Discipline Streak

The Trade Flow: Plan → Size → Execute

Every trade passes through a 3-step wizard. At any step, if a rule is violated → **haptic vibration + red banner + blocked**.

1. PLAN — Gate Checklist

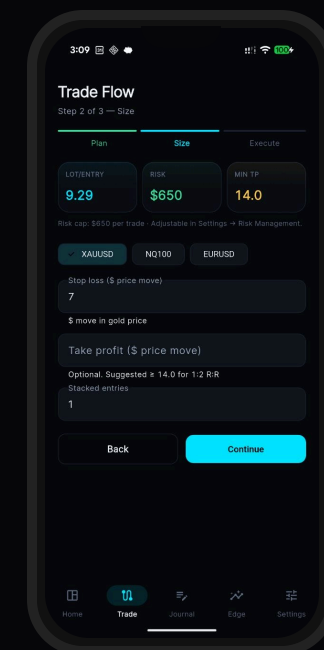

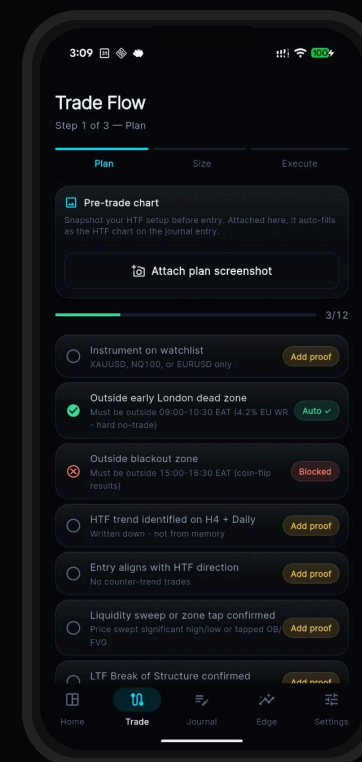

Select instrument → gates activate. Manual gates require typed justification or chart screenshot. Auto-gates compute live (session windows, lock status, daily cap). **Cannot proceed until ALL pass.**

2. SIZE — Risk Calculator

Auto-computes lot size from risk cap. Validates R:R $\geq 1:2$. Blocks oversized positions. Multi-entry stacking capped at combined risk limit. No mental math.

3. EXECUTE — Final Check + Reflection

Last validation: lock, session, cap. Trade logs → immediate 30-sec reflection (plan adherence, exit type, emotional state 1-10). Data feeds the Edge Map.

Risk Calculator

Gate System — Auto/Manual/Blocked states
Formerly "4x Trades" — now LocoTrader

The Personal Edge Map

Self-calibrating intelligence that learns from each trader's own behavior. After 30+ trades, the app becomes a mirror — not a generic dashboard.

SYMBOLS

Per-symbol P/L matrix. Which pairs actually make you money vs. which bleed. Auto-flags worst performers.

TIMING

2-hour heatmap. Your personal best/worst trading windows detected automatically. Dead zones surfaced.

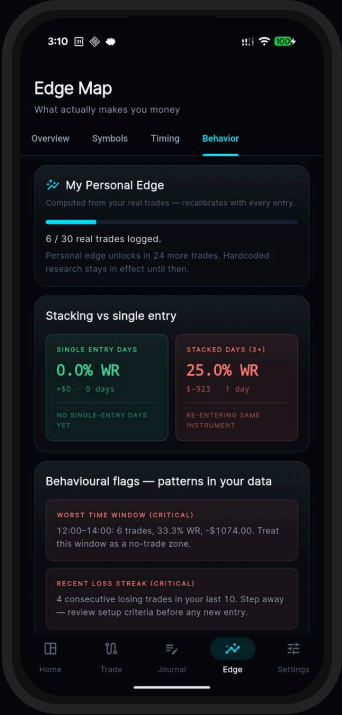

BEHAVIOR

Mood → P/L correlation. Stacking analysis. Trigger detection (FOMO, Revenge, Plan). Streak patterns.

AI COACH OUTPUT — REAL EXAMPLE

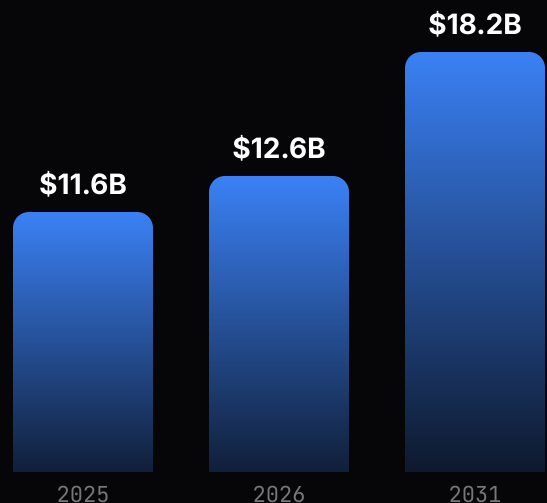

- ✓ **Strength:** "A+ setups: +\$340 this week. Only take A+."
- ✗ **Leak:** "EURUSD: -\$180 across 6 trades. Cut it or fix the setup."
- ⚠ **Timing:** "06:00-08:00 EAT = 22% WR vs 55% overall. Blackout."
- ♦ **Truth:** "60% of your trades are FOMO. Stop revenge-trading."

Powered by Gemini AI (free tier) + local rule-based engine (offline). **\$0/user/month API cost.**

Journals record history. **We change the future.**

CAPABILITY	TRADEZELLA	EDGEWONK	TRADERVUE	LOCOTRADER
Pre-trade rule enforcement	X	X	X	✓ 7-8 per template
Auto-lock after tilt (no override)	X	X	X	✓ 24hr lock
Real-time drawdown engine (prop-firm aware)	~ basic	~ post-hoc	X	✓ DD/trailing/daily
Weekly R-unit risk budget	X	X	X	✓ auto-stop
Mood → P/L correlation tracking	X	~ manual	X	✓ auto
Works fully offline (on-device AI)	X	X	X	✓
Mobile-native app	~ web app	~ web app	~ web app	✓ Flutter native
Pricing	\$35 – \$99/mo	\$169 one-time	\$30 – \$50/mo	Freemium + \$9.99/mo
Users / Traction	100K+ users	10+ years, 8M trades	Est. 20K+	Pre-launch (MVP complete)

Core insight: Every competitor is a *passive recorder*. None prevent bad trades. None enforce rules in real-time.

Three forces converging **right now**

AI Maturity

On-device ML (Google ML Kit) + free LLM APIs (Gemini 15 req/min) make personalized coaching possible at **\$0/user/month**. This wasn't viable 2 years ago.

Prop Firm Explosion

FTMO, Apex, TopStep, MyFundedFX — millions of traders paying \$100-\$500 for challenges. They **must** manage drawdown or fail. Tools that enforce rules = must-have.

Mobile-First Gen

62% of retail orders now via mobile (Charles Schwab 2025 Annual Report). Gen-Z trades on phones. Every competitor is a **desktop web app**. We're phone-native.

Market validation: "On-Device ML Behavioral Nudges Reducing Churn" is cited as a **key market driver** in the 2026 Mordor Intelligence Online Trading Platform Market Report — confirming our core thesis.

Freemium + Pro subscription

FREE TIER (Forever)

Basic journal, 3 gates, manual trade logging, daily P/L tracking, single account.
Enough to be useful — not enough to transform.

PRO TIER — \$9.99/mo or \$99/yr

Full gate system (all templates), AI Edge Map, drawdown engine, risk budgets, auto-lock, mood tracking, weekly AI digest, multi-account, PDF tear sheets, encrypted backups, AI coaching.

EARLY ACCESS — \$49 Lifetime (limited)

First 500 users get permanent Pro. Creates urgency, validates demand, and builds founding community.

85%+

Gross margin
(near-zero COGS)

\$0

AI cost per user
(free tiers + on-device)

FUTURE REVENUE STREAMS

- ◆ **B2B licensing** to prop firms as recommended risk tool
- ◆ **White-label API** — firms embed LocoTrader in their platforms
- ◆ **Premium AI coaching** with advanced models
- ◆ **Data insights** for trading educators and mentors

Unit economics: CAC target \$8-15 · LTV \$120+ (12mo avg retention) · LTV:CAC > 8x

Pre-launch — but the product is real.

What's Built & Working Today

- ◆ Landing page live (locotrader.app)
- ◆ Full Flutter app (25+ screens)
- ◆ AI coaching (cloud + local)
- ◆ 10 notification categories
- ◆ Paddle payments integrated
- ◆ Supabase backend (auth + DB)
- ◆ All risk engines functional
- ◆ Android home-screen widget

v2.0

Production-ready

11mo

Development time

\$2K

Bootstrapped

Founder dogfooding: Used internally for 8 months. Edge Map surfaced patterns that manual journaling missed — validating the core thesis.

Go-to-Market (3 Phases)

PHASE 1 — Community & Affiliates

YouTube traders (10K-100K subs) as affiliates at 20-30% rev share. They need content; we provide a product worth demoing. Target: 100 partners in 6 months.

PHASE 2 — Paid Acquisition

TikTok + Instagram short-form: "Watch this app BLOCK me from revenge-trading." Viral-ready format. Target CPA: \$8-15.

PHASE 3 — Prop Firm Partnerships

B2B integration as a recommended risk tool. Firms want traders to pass — we help them pass. Revenue share or white-label.

Viral loop: PDF tear sheets include LocoTrader branding → traders share equity curves on social → organic acquisition.

18-month execution plan

Q3 2026

Launch

Android Play Store. Early access campaign. First 500 lifetime users. YouTube affiliate program live. Press outreach.

Q4 2026

iOS + Growth

App Store launch. Paid ads (TikTok/IG). First 5K users. Subscription model live. MT5 CSV import.

Q1 2027

Intelligence

Screenshot OCR import. Advanced AI coaching. Prop firm templates (FTMO/Apex rules pre-loaded). 15K users target.

Q2-Q4 2027

B2B + Scale

Prop firm partnership API. White-label offering. Community features. Seed round. 10K users, \$20K MRR.

TEAM

Built by a trader, for traders.

Erick Mafole

Founder & CEO

Dar es Salaam, Tanzania

- ◆ **7+ years** active forex/CFD day trader
- ◆ **Full-stack developer** — Flutter, React, TypeScript, Dart, Node.js
- ◆ **Built LocoTrader for himself first** — genuine pain point, not market research
- ◆ **Solo-shipped entire stack:** landing page, payments, backend, mobile app, AI
- ◆ **Rare intersection:** trader who can code — most tools are built by engineers who don't trade

Hiring Plan (Post-Funding)

Mobile Engineer — iOS polish + broker integrations

Growth Marketer — affiliate program + paid acquisition

Part-time Designer — brand + App Store optimization
