SECTION 01

Brand Positioning

Brand Identity

Name: LocoTrader

Tagline: "Trade Your Rules. Not Your Feelings."

Category: Trading Discipline Operating System

Brand Archetype: The Ruler/Coach - authoritative, protective, no-nonsense

Positioning Statement

For prop-firm and retail forex/futures traders

Who lose money due to emotional decisions, revenge trading, and rule violations

LocoTrader is a mobile-first trading discipline OS

That enforces your rules BEFORE you can enter a trade - not after the damage is done

Unlike TradeZella, TraderSync, and Edgewonk (reactive journaling tools)

Our product prevents the mistake from happening in the first place through pre-trade gates, AI-powered personal edge detection, and automatic behavioral lockouts.

Core Brand Values

1. Discipline Over Motivation - Motivation fades. Systems don't.
 2. Prevention Over Cure - Block the mistake before it costs you \$500.
 3. Evidence Over Opinion - Every insight backed by YOUR data, not generic advice.
 4. Accountability Over Comfort - The app won't let you lie to yourself.
 5. Accessibility Over Exclusivity - Institutional-grade tools, \$0/month.
-

Voice & Tone Guidelines

Brand Voice: "No-BS Disciplinarian Coach"

Do	Don't
"Your stacking win rate is 8%. Stop.	"Consider reducing your stacking frequency"
"You lost 23 straight trades at 09:.	"Morning sessions may not be optimal"
"Gates blocked your entry. Good. Yo.	"The system suggests waiting before your ne.
"572 trades don't lie. Here's your .	"Based on our analysis, you might consider..

Tone Spectrum

- App notifications: Direct, short, urgent ("? 3 red trades. Locked for 24h.")
- Marketing content: Provocative + educational ("73% of you are losing because of THIS, not your strategy")
- Social media: Raw, relatable, data-backed ("Traded EU at 09:00 EAT for 3 months. 23 consecutive losses. Here's the spreadsheet.")
- Investor communications: Professional, metrics-driven, vision-clear

Language Rules

- Never say "might" or "consider" - say "do" or "stop"
- Never use trading jargon without context for non-traders
- Always include a specific number/stat when making a claim
- Use "you" not "users" or "traders" - personal, direct
- Short sentences. No fluff. Every word earns its place.

Messaging Framework

Primary Message (Hero)

"The only trading app that blocks you from entering a bad trade."

Supporting Messages

Audience Segment	Message	Proof Point
Prop firm traders	"Stop failing challenges.	Drawdown engine + daily c.
Revenge traders	"After 3 red trades, you.	Auto-lock feature, integr.
Journal skeptics	"Journals tell you what .	Gate system blocks entry
Cost-conscious	"TradeZella charges \$99/.	Free tier with Gemini AI

Data lovers	"After 30 trades, the ap.	Personal Edge Map with ti.
-------------	---------------------------	----------------------------

Visual Identity Direction

Color Palette

- Primary: Deep navy (#0F172A) - authority, trust, seriousness
- Accent: Electric green (#10B981) - profit, gates passing, go-signals
- Warning: Amber (#F59E0B) -> Red (#EF4444) - drawdown spectrum
- Background: Slate (#1E293B) - dark mode native (traders use dark themes)

Typography

- Headlines: Bold, condensed sans-serif (Impact/authority feel)
- Body: Clean, legible sans-serif (Inter, SF Pro)
- Data/Numbers: Monospace (JetBrains Mono, SF Mono) - precision feel

Imagery Style

- Real trading data screenshots (with permission)
- Before/after equity curves
- Gate system blocking entries (product shots)
- Dark, moody, professional - NOT gamified or neon-bro
- No stock photos of people in suits pointing at screens

Competitive Positioning Map

LocoTrader owns the top-right quadrant: Proactive + Affordable. No competitor occupies this space.

Brand Promise

"If you follow your rules, you will be profitable. We make sure you follow your rules."

Elevator Pitch (30 seconds)

"73% of retail traders lose money - not because of bad strategy, but because they can't follow their own rules. LocoTrader is the first trading app that actually BLOCKS you from entering a trade until your pre-trade checklist passes. It's like having a risk manager sitting next to you, except it's on your phone, it's powered by AI that learns YOUR specific patterns, and it costs \$0 per month. We're launching a one-time lifetime deal, then it's gone forever."

Sources: Retail trader loss statistics from EU broker disclosures (ESMA MiFID II requirement - brokers must disclose % of retail clients losing money; average across major brokers is 70-76%). Market data from Mordor Intelligence Online Trading Platform Market Report (2026).

SECTION 02

App Store Listing

ASO-optimized copy for iOS App Store and Google Play Store

iOS App Store

App Name (30 chars max)

LocoTrader: Trading Discipline

Subtitle (30 chars max)

Pre-Trade Gates & Risk Control

Keywords (100 chars, comma-separated)

trading, journal, prop, firm, forex, risk, management, discipline, lot, size, calculator, drawdown, ...

Category

- Primary: Finance
- Secondary: Productivity

Description (4000 chars max)

Stop losing money to emotional trades. LocoTrader is the only app that BLOCKS you from entering a trade until your rules are satisfied.

73% of retail traders lose money - not because of bad strategy, but because they can't follow their own rules. Revenge trading, FOMO entries, oversized positions, trading during dead zones. You know what you're supposed to do. You just can't stop yourself.

Until now.

? PRE-TRADE GATES - Can't trade until rules pass

Before you can log a trade, LocoTrader checks:

- Are you in your session window?
- Have you hit your daily trade cap?
- Is your account locked from consecutive losses?
- Did you provide proof for your setup (chart screenshot or typed justification)?

If any gate fails -> you cannot proceed. No override. No negotiation.

? PERSONAL EDGE MAP - AI learns YOUR patterns

After 30+ trades, LocoTrader reveals:

- Which symbols actually make you money
- Your personal prime time windows vs. dead zones
- Day-of-week win rate biases
- Setup quality vs. actual P/L correlation
- Behavioral patterns killing your edge (stacking, FOMO, etc.)

[!] PROP FIRM RISK MANAGEMENT

- Real-time drawdown tracking (daily + trailing)
- Color-coded: Green -> Yellow (40%) -> Red (70%)
- Weekly R-unit budget with auto-stop at 100%
- Configurable daily trade cap (1/2/3/5)
- Auto-lock after consecutive losses - 24-hour cooldown, no override

? RISK CALCULATOR

- Fixed risk cap enforcement (\$125 or custom)
- Auto lot-size from stop-loss distance
- Minimum 1:2 R:R enforcement
- Multi-entry stacking validation

? AI TRADING COACH (Free - Powered by Gemini)

- Post-trade debrief: what you did well, what to fix
- Weekly AI digest every Sunday
- One drill for tomorrow based on your patterns

? BUILT FOR MOBILE TRADERS

- Dark mode native
- Biometric lock (Face ID / fingerprint)
- Economic calendar with red-event warnings (60 min before)
- Smart notifications: drawdown danger, loss streaks, mood check-ins
- Works offline - syncs when connected

? COMPLETELY FREE

No subscription. No trial. No credit card. The core app is free forever.

WHAT MAKES US DIFFERENT:

- TradeZella, TraderSync, Edgewonk = tell you what went wrong AFTER
 - LocoTrader = STOPS the mistake from happening
-

Built by a trader who blew 3 accounts before building the system that made him profitable. This isn't theory. It's battle-tested.

Download now. Stop bleeding capital tomorrow.

Promotional Text (170 chars, changeable without review)

? Launch Special: One-time lifetime deal available for early adopters. Once spots fill, ...

What's New (for updates)

v2.0 - The Complete Prop-Firm Suite:

- Gate system with proof requirements
- Personal Edge Map (AI learns your patterns after 30 trades)
- Drawdown engine with auto-lock
- Weekly AI digest (every Sunday at 6 PM)
- Multi-account support
- Encrypted AES-256 backups

Google Play Store

App Title (50 chars max)

LocoTrader: Trading Discipline & Risk Management

Short Description (80 chars max)

Pre-trade gates block bad entries. AI learns your edge. Free prop firm tools.

Full Description (4000 chars max)

Stop losing money to revenge trades, FOMO entries, and emotional decisions. LocoTrader is the first trading app that enforces your rules BEFORE you enter a trade - not after the damage is done.

? WHY TRADERS LOSE MONEY

73% of retail traders are unprofitable. Not because of bad strategy - because of bad execution. You know not to revenge trade. You do it anyway. You know your dead zones. You trade them anyway.

LocoTrader fixes this with PRE-TRADE ENFORCEMENT.

? PRE-TRADE GATE SYSTEM

Before you can log any trade, gates must pass:

- ? Session window check (are you in your trading hours?)
- ? Daily trade cap (haven't exceeded your limit?)
- ? Account lock status (not on cooldown from losses?)
- ? Proof requirement (screenshot or typed justification)

Gates don't pass? Trade doesn't happen. Period.

? PERSONAL EDGE MAP (Self-Learning AI)

After 30+ trades, LocoTrader's AI reveals:

- Your profitable symbols vs. money-bleeding pairs
- Prime time windows vs. dead zones (hour-by-hour win rate)
- Day-of-week performance patterns
- Setup quality -> P/L correlation
- Behavioral flags (stacking kills your edge? Now you'll know.)

Real example: One user discovered 23 consecutive losses between 09:00-10:30. After avoiding that window -> immediate profitability.

? PROP FIRM RISK MANAGEMENT

Built specifically for FTMO, MyForexFunds, Topstep, and all challenge accounts:

- Real-time drawdown tracking (daily + trailing peak-to-trough)
- Color-coded dashboard: Green -> Yellow (40%) -> Red (70%)
- Weekly Risk Budget in R-units (warns at 80%, stops at 100%)
- Daily trade cap: 1, 2, 3, or 5 trades max
- Auto-lock after consecutive losses (24-hour cooldown, NO override)
- Integrity log: every reset, override, balance change is timestamped

? RISK CALCULATOR

- Set your max risk per trade (\$125 or custom)
- Auto-calculates lot size from stop-loss distance
- Enforces minimum 1:2 reward-to-risk ratio
- Validates multi-entry stacking (combined risk <= limit)

? AI TRADING COACH (100% Free)

Powered by Gemini AI:

- Post-trade debrief after every trade
- Weekly AI digest every Sunday (win rate, worst habit, focus for next week)
- Personalized drills based on your actual data

? SECURITY & PRIVACY

- Biometric lock (fingerprint / face)
- AES-256 encrypted backups
- Data stays on YOUR device (local-first architecture)
- No account required for core features

? \$0/MONTH FOREVER

We're not a subscription trap. Core features are free. No trial countdown. No feature gates after 7 days. No credit card.

? BUILT BY A REAL TRADER

Not built by a Silicon Valley team who's never placed a trade. Built by a trader who lost real money, then built the system that stopped the bleeding. 572 documented trades. Real data. Real edge.

Download now. Your next revenge trade is your last.

[20-25s] Text: "LocoTrader blocks the trade before you lose money."
[25-30s] CTA: "Download free. Stop losing tomorrow."

ASO Notes

High-Volume Keywords to Target

- "trading journal" - High volume, high competition
- "prop firm tracker" - Medium volume, low competition <- OPPORTUNITY
- "lot size calculator" - High volume, medium competition
- "trading discipline" - Low volume, very low competition <- own this category
- "forex risk management" - Medium volume, low competition
- "drawdown tracker" - Low volume, very low competition <- own this

Localization Priority

1. English (US) - primary
2. English (UK) - secondary
3. Swahili (Tanzania/Kenya) - community building
4. French (West Africa) - expanding market
5. Portuguese (Brazil) - large trading community

ASO keyword strategy informed by general App Store category data for Finance apps. Specific search volume requires tools like App Annie/Sensor Tower once live.

? Community/Social Proof	10%	Testimonials, milestones,.

Pre-Launch Phase (Weeks 1-6): Build Audience Before Product

Week 1: "The Problem"

Post 1 (Twitter/X - Thread)

Title: "I tracked 572 trades over 18 months. Here's why I was losing even with a winning strategy."

Hook: "My win rate was 32.4%. My R:R was 2.71. I was PROFITABLE on paper. But my account was bleeding."

Thread reveals: stacking (8.3% WR vs 50% single), dead zones (23 consecutive losses 09:00-10:30), FOMO entries

CTA: "I built an app that would have saved me \$X. More soon."

Post 2 (Twitter/X - Single tweet)

"73% of retail traders lose money.

It's not because of bad strategy.

It's because no one is stopping you from revenge trading at 2 AM.

>

What if an app physically BLOCKED you from entering a bad trade?"

Week 2: "Dead Zones"

Post 1 (Twitter/X - Data visual)

"I had a 0% win rate between 09:00-10:30 for 3 months straight.

>

23 consecutive losses.

>

I didn't notice until I let the data speak.

>

[Screenshot of time-based P/L chart]

>

Everyone has dead zones. Do you know yours?"

Post 2 (Twitter/X or Instagram)

"Things that don't work:

[X] 'I'll just be more disciplined'

[X] 'I'll journal more consistently'

[X] 'I'll meditate before trading'

>

Things that work:

[OK] An app that literally won't let you trade during your dead zone

>

Building this."

Week 3: "Stacking Kills"

Post 1 (Twitter/X - Thread)

"Stacking entries killed my edge. The data:

>
■ *Single entry: 50% win rate -> profitable*
■ *Stacked entries: 8.3% win rate -> account destroyer*
>
■ *Same strategy. Same pairs. Same times.*
■ *The ONLY difference was stacking.*
>
■ *Here's 18 months of proof: [data visual]"*

Post 2 (Twitter/X)

■ *"Your trading journal tells you stacking is bad.*
>
■ *After you've already lost \$500.*
>
■ *What if your app BLOCKED the 2nd entry until you typed WHY you're adding?*
>
■ *That's what I'm building. Pre-trade enforcement."*

Week 4: "The Gate System" (Product Reveal)

Post 1 (Twitter/X - Video/GIF)

■ *"Building in public: Here's how the Gate System works.*
>
■ *Before you can log a trade:*
■ *1. [OK] Session window check*
■ *2. [OK] Daily cap not exceeded*
■ *3. [X] Account locked (3 consecutive losses)*
>
■ *Result: TRADE BLOCKED.*
>
■ *No willpower needed. The system says no.*
>
■ *[Screen recording of gate system]"*

Post 2 (Twitter/X)

■ *"Every trading app on the market:*
■ *? 'Log your trade'*
■ *? 'Review your mistakes'*
■ *? 'Do better next time'*

>
■ *LocoTrader:*
■ *? 'You can't trade right now. Here's why.'*
>
■ *Prevention > Cure."*

Week 5: "Prop Firm Pain"

Post 1 (Twitter/X - Thread)

■ *"How prop firm challenges actually fail:*
>
■ *Day 1-3: Cautious, follow rules [OK]*
■ *Day 4-7: Small winners, confidence grows*
■ *Day 8: First loss, slightly bigger position*
■ *Day 9: Revenge trade, break daily drawdown*
■ *Day 10: Challenge over.*
>
■ *It's ALWAYS the same pattern.*
>
■ *What if your app auto-locked your account at 70% of max drawdown?*
>
■ *That's built. Coming soon."*

Post 2 (Twitter/X)

■ *"FTMO max daily loss: 5%*
■ *MyForexFunds max daily loss: 5%*
■ *Topstep max daily loss: varies*
>
■ *LocoTrader tracks ALL of them.*
■ *Warns you at 40% (yellow).*
■ *Warns you at 70% (red).*
■ *LOCKS you before you hit the limit.*
>
■ *Free. No subscription."*

Week 6: "Waitlist / Early Access Push"

Post 1 (Twitter/X - Thread)

"I'm launching LocoTrader in [X] weeks.

>

Here's what's included in the lifetime deal:

- Pre-trade gate system (blocks bad entries)
- Personal Edge Map (AI learns YOUR patterns)
- Prop firm drawdown protection
- AI coach (free, powered by Gemini)
- Risk calculator with enforcement
- Multi-account support

>

One-time payment. Then it's gone forever.

>

[Link to waitlist]"

Post 2 (All platforms)

"Early access is open.

[X] spots at the lifetime price.

Once they're gone -> gone forever.

>

[Link]"

Launch Phase (Weeks 7-9): Drive Downloads

Week 7: Launch Week**Post 1 - Launch Day (All platforms)**

"LocoTrader is LIVE. ?

>

The only trading app that blocks bad trades before they happen.

>

- [OK] Pre-trade gates
- [OK] AI-powered edge detection
- [OK] Prop firm drawdown protection
- [OK] Free forever

>
■ *Lifetime deal: \$49. Limited spots.*
■ *When they're gone, they're gone.*
>
■ *[App Store link] [Google Play link]"*

Post 2 - Day 2-3 (Social proof request)

■ *"If you downloaded LocoTrader yesterday:*
>
■ *1. Tell me what gate blocked your first trade*
■ *2. Screenshot it*
■ *3. I'll feature you*
>
■ *The best stories get lifetime premium free."*

Week 8: "First Results"

Post 1 (Twitter/X)

■ *"Day 7 of LocoTrader being live:*
>
■ *- [X] downloads*
■ *- [X] trades blocked by gates*
■ *- [X] accounts saved from bust*
■ *- Most common gate triggered: [data]*
>
■ *The system works. Building in public."*

Post 2 (Twitter/X)

■ *"First DM from a user:*
>
■ *'The app stopped me from revenge trading after 2 losses. I would have blown my challenge.'*
>
■ *This is why I built it.*
>
■ *[screenshot with permission]"*

Week 9: "Why It's Free"

Post 1 (Twitter/X - Thread)

■ "People keep asking: 'Why is LocoTrader free when competitors charge \$99/mo?'"

>

■ Here's the honest answer:

>

■ 1. I built this for MYSELF first

■ 2. Trading apps shouldn't cost more than your account can afford

■ 3. If you're losing money on bad trades, paying \$99/mo for a journal that DOESN'T stop the trades is insane

■ 4. The lifetime deal funds development. After that, free forever.

>

■ That's it. No catch."

Growth Phase (Weeks 10-12): Retention + Referral**Week 10: "Edge Map Reveals"****Post 1 (Twitter/X - Thread)**

■ "After [X] users have logged 30+ trades, here's what the Edge Map is revealing:

>

■ Most common dead zone: [time]

■ Most common unprofitable behavior: [stacking/FOMO/etc]

■ Average win rate improvement after avoiding dead zones: [X]%

>

■ The data speaks."

Week 11: "Before/After"**Post 1 (Twitter/X)**

■ "Before LocoTrader:

■ - [X] trades/day (overtrading)

■ - [X]% win rate

■ - Revenge traded 3x/week

>

■ After 30 days with LocoTrader:

- [X] trades/day (capped)
- [X]% win rate
- 0 revenge trades (gates blocked them)

>

[User testimony with permission]"

Week 12: "Referral Push"

Post 1 (Twitter/X)

"For every trader you refer to LocoTrader:

>

You get [reward].

They get [reward].

>

Because the best marketing for a discipline app is a trader who stopped losing."

Posting Schedule

Day	Platform	Content Type
Tuesday	Twitter/X	Primary post (thread or d.
Thursday or Friday	Twitter/X + 1 other	Supporting post (shorter,.

Best Times to Post (Trading Community)

- Twitter/X: 7:00-8:00 AM EST (pre-market), 4:00-5:00 PM EST (post-market review)
- Instagram: 11:00 AM - 1:00 PM EST (lunch break scrolling)
- TikTok: 7:00-9:00 PM EST (evening content consumption)

Source: General social media engagement data for finance/trading niche - optimize once you have analytics.

Content Repurposing Strategy (Maximize 1-2 posts/week)

1. Write one Twitter thread ->
2. Extract 3-4 tweets from it for the rest of the week ->

3. Turn best thread into an Instagram carousel (once/month) ->
 4. Compile monthly threads into a blog post (SEO) ->
 5. Record yourself reading the thread -> TikTok/Reels (once you're ready for video)

SECTION 04

Go-To-Market Strategy

Phase-based launch plan for a solo founder with zero current traction, targeting global English-speaking markets with Africa-first angle.

Executive Summary

Launch model: One-time lifetime deal (limited spots) -> free app with premium features funded by initial sales
Timeline: 3-6 months to app store launch
Primary channel: Organic social (Twitter/X trading community) + community infiltration
Budget assumption: \$0-\$500 (bootstrapped pre-seed)

Phase 0: Foundation Building (Months 1-2)

Objective: Build audience before product launch

Action	Timeline	Cost	Expected Output
Set up Twitter/X with.	Week 1	\$0	Profile established
Post 572-trade datase.	Weeks 1-4	\$0	200-500 followers
Join 5 trading Discor.	Week 1	\$0	Community presence
Create landing page w.	Week 2	\$0-9	Email capture
Start "building in pu.	Week 3+	\$0	Authentic following
Engage with prop firm.	Daily	\$0	Network building

Key Communities to Infiltrate

Platform	Community	Size	Strategy
Discord	FTMO Discord	50K+	Help traders with .

Discord	Trading communitie.	10-100K each	Share data insight.
Reddit	r/Forex	900K+	Answer questions a.
Reddit	r/FuturesTrading	100K+	Same approach
Twitter/X	Prop firm trader a.	-	Quote-tweet with d.
YouTube	Comment on trading.	-	Thoughtful comment.

"Building in Public" Content Schedule

- Monday: Development update (screenshot of feature being built)
- Thursday: Trading data insight (from your 572-trade dataset)
- Saturday (optional): Interaction/engagement with community

Phase 1: Pre-Launch (Month 3-4)

Objective: Convert audience into waitlist, create urgency

Action	Timeline	Cost	Expected Output
Launch waitlist with .	Month 3, Week 1	\$0	100-300 signups
Early access for firs.	Month 3, Week 2	\$0	Beta feedback
DM top 50 engaged fol.	Month 3, Week 2	\$0	10-20 beta users
Create App Store scre.	Month 3, Week 3	\$0	Store-ready
Collect 5+ testimonia.	Month 4	\$0	Social proof
"Countdown" content s.	Month 4, final 2 w.	\$0	Urgency + hype

Waitlist Urgency Framework

"LocoTrader Lifetime Deal: \$49 one-time
- Only [X] spots available
- When they're gone -> price disappears forever
- Includes all future features for life

Join the waitlist. Get notified before public launch."

Beta Tester Selection Criteria

1. Active prop firm trader (can validate drawdown features)
2. Has blown at least 1 account (understands the pain)

- 3. Active on social media (will share experience)
- 4. Mix of geographies (Africa, US/EU, SEA)

Phase 2: Launch (Month 4-5)

Objective: Drive downloads, convert lifetime deals, establish presence on stores

Launch Week Sequence

Day	Action	Channel
Mon (D-7)	"One week until LocoTrad.	Twitter, all platforms
Wed (D-5)	Beta tester testimonial .	Twitter
Fri (D-3)	"3 days. Here's what 20 .	Twitter thread
Sun (D-1)	"Tomorrow. Lifetime deal.	All platforms
Mon (D-Day)	LAUNCH POST - all plat.	Twitter, IG, Reddit, Disc.
Tue (D+1)	"X downloads in 24 hours.	Twitter
Wed (D+2)	Feature first user story.	Twitter
Fri (D+4)	"X% of lifetime spots ta.	All
Sun (D+6)	Week 1 recap + data (tra.	Twitter thread

Launch Day Channels

Channel	Action	Expected Impact
Twitter/X	Launch thread + pinned t.	Primary driver
Trading Discords (5+)	Personal message in rele.	20-50 downloads
Reddit r/Forex	"I built this" post (fol.	50-200 downloads
Reddit r/PropFirm	Same	20-100 downloads
Product Hunt	Submit (if web version e.	50-200 visits
WhatsApp/Telegram groups (A.	Personal messages to tra.	10-30 downloads
Direct DMs to 100 engaged f.	Personal invitation	20-40 downloads

First 30 Days Targets

Metric	Target	Stretch
--------	--------	---------

Downloads	200	500
Lifetime deals sold	30	75
Revenue	\$1,470	\$3,675
7-day retention	40%	60%
App store rating	4.5+ (from beta testers)	4.8+
Social followers gained	+300	+700

Phase 3: Post-Launch Growth (Months 5-6+)

Objective: Sustainable growth through word-of-mouth and content

Growth Loops

Organic Growth Engines

- 1. "Gates Blocked" Shareable Moment
 - When a gate blocks a trade, prompt: "Share this save on Twitter?"
 - Auto-generates: "LocoTrader just stopped me from [revenge trading / trading my dead zone / exceeding daily cap]. The system works. ??"
 - This is organic, authentic content from real users
- 2. Weekly AI Digest Sharing
 - Sunday digest includes a "Share your week" button
 - One-tap share: "My LocoTrader week: X/X trades won, 0 violations, edge improving. Week 4 streak."
- 3. PDF Tear Sheet as Marketing
 - When users export their PDF tear sheet -> LocoTrader branding visible
 - Prop firm auditors, accountability partners see the brand
- 4. Referral Program (post-launch)
 - Refer a friend -> both get 1 month of premium features unlocked
 - Or: refer 3 friends -> lifetime premium access

Paid Acquisition (Only if Phase 2 proves product-market fit)

Channel	Budget	CPA Target	Notes
---------	--------	------------	-------

Twitter/X ads	\$100-300/mo	< \$3	Retarget engaged f.
Google UAC (App Insta.	\$200-500/mo	< \$2	Keywords: "trading.
Influencer seeding	\$0-200	N/A	Send free access t.

Geographic Rollout Priority

Phase	Market	Why
1 (Launch)	English-speaking Africa .	Home market, growing trad.
1 (Launch)	US/UK prop firm traders	Largest prop firm market,.
2 (Month 6+)	Southeast Asia (Malaysia.	Massive retail trader gro.
3 (Month 9+)	South America (Brazil, C.	Growing prop firm market,.

Africa-First Advantages

- Mobile-first market: 80%+ internet access is via smartphone (matches our mobile-first product)
- Underserved: No discipline tools built FOR African traders
- Growing community: Forex trading is one of the fastest-growing side hustles in East/West Africa
- Word-of-mouth culture: Strong WhatsApp/Telegram group culture for sharing tools
- Low competition: TradeZella, TraderSync barely market to Africa
- Founder authenticity: "Built in Dar es Salaam by a real trader" = powerful narrative

Channel Strategy Summary

Channel	Role	Investment	Expected % of Down.
Twitter/X	Primary awareness .	Time (30 min/day)	35%
Trading Discords	Community trust bu.	Time (15 min/day)	20%
Reddit	Launch spikes + SEO	Time (occasional p.	15%
Word-of-mouth / refer.	Sustainable loop	Product feature	15%
WhatsApp/Telegram (Af.	Regional penetrati.	Personal network	10%
Paid ads	Scale (Phase 3 onl.	\$300-500/mo	5% (initially)

Risk Mitigation

Risk	Mitigation
App store rejection	Submit 4-6 weeks before planned launch; hav.
Zero traction on launch day	Pre-built audience of 500+ followers + 200+.
Negative reviews from bugs	Beta test with 20 users for 2-4 weeks befor.
Competitors copy gate feature	Speed to market + brand loyalty + continuou.
Revenue too low from one-time deals	Plan transition to premium features / subsc.

Success Criteria

Timeframe	Must Hit	Good	Great
Launch day	50 downloads	100 downloads	200+ downloads
Month 1	200 downloads, \$1,.	500 downloads, \$3,.	1,000 downloads, \$.
Month 3	500 MAU, 30% reten.	1,000 MAU, 40% ret.	2,000 MAU, 50% ret.
Month 6	1,000 MAU, \$5,000 .	3,000 MAU, \$10,000	5,000+ MAU, breake.

Strategy informed by mobile app launch benchmarks and trading app market dynamics. Adjust targets based on actual pre-launch audience size achieved.

SECTION 05

Metrics & KPIs

North Star: Revenue / MRR (Monthly Recurring Revenue equivalent)

Tracking framework for pre-launch, launch, and growth phases

North Star Metric

Revenue (total lifetime deal sales + any future monetization)

Why: As a solo founder bootstrapping, revenue validates product-market fit and funds development. Everything else is a leading indicator.

Metric Hierarchy

```
REVENUE (North Star)
??? Conversion Rate (waitlist -> download -> purchase)
?   ??? Waitlist signups
?   ??? Download-to-trial rate
?   ??? Trial-to-purchase rate
??? User Acquisition
?   ??? Downloads (organic)
?   ??? Downloads (paid, if applicable)
?   ??? Referral rate
??? Retention (drives word-of-mouth -> more revenue)
    ??? Day 1 / Day 7 / Day 30 retention
    ??? Weekly Active Users (WAU)
    ??? Feature adoption (gates used, trades logged)
```

Pre-Launch Metrics (Months 1-3)

Metric	Target	How to Track
--------	--------	--------------

Twitter followers	500 by launch	Twitter Analytics
Waitlist signups	200+	Landing page form (Carrd/
Email open rate	> 40%	Email tool (Resend, Mailc.
Engagement rate (Twitter)	> 5%	Likes + replies + RTs / i.
Discord/community interacti.	50+ conversations	Manual tracking
Beta tester signups	20	Direct outreach
Beta feedback NPS	> 8/10	Survey (Google Forms)

Benchmarks (Finance/Trading App Category)

- Average Twitter engagement rate for finance: 1.5-3% (source: Sprout Social 2024)
- Email open rate for tech/finance: 20-25% average (source: Mailchimp benchmarks)
- Your target of 5%+ engagement and 40%+ open rate = high-engagement niche audience

Launch Metrics (Month 4-5)

Metric	Target	Stretch	Benchmark
Day 1 downloads	50	200	Top 1% indie apps .
Week 1 downloads	150	500	-
Month 1 downloads	300	1,000	-
Lifetime deals sold	30 (\$1,470)	100 (\$4,900)	-
App Store rating	4.5+	4.8+	Finance app averag.
Day 1 retention	60%	75%	Industry avg: 25% .
Day 7 retention	35%	50%	Industry avg: 12% .
Day 30 retention	20%	35%	Industry avg: 6% (.

Retention Benchmarks (Mobile Finance Apps)

Timeframe	Industry Average	Top Quartile	LocoTrader Target
Day 1	35-40%	55-65%	60%
Day 7	20-25%	35-45%	35%
Day 30	10-15%	25-35%	20%
Day 90	5-8%	15-20%	15%

Source: Adjust Mobile App Benchmarks Report (2024), AppsFlyer State of App Marketing (2024)

Why LocoTrader should beat benchmarks:

- Daily use case (traders check before EVERY trade)
- Gate system creates habit loop (trigger: want to trade -> behavior: check gates -> reward: allowed to trade)
- Lock system ensures users return (check countdown)

Growth Metrics (Months 5-12)

Metric	Month 6 Target	Month 12 Target
Monthly Active Users (MAU)	500	2,000
Weekly Active Users (WAU)	250	1,000
Daily Active Users (DAU)	80	350
DAU/MAU ratio	16%	17.5%
Total revenue	\$3,000	\$10,000
Organic install rate	70%+ of downloads	60%+
Referral rate	5% of users refer 1+	10%
App store reviews	50+	200+
Average session length	3-5 min	3-5 min
Sessions per user/day	2-3	2-4

DAU/MAU Benchmark

- Social apps: 50%+ (daily use expected)
- Finance apps: 15-25% (check-in pattern)
- Trading apps: 20-30% (daily when markets open)
- LocoTrader target: 17.5% (conservative - only open market days = ~22/30 days)

Product-Specific Metrics

Gate System Health

Metric	What It Tells You	Target
Gates triggered / day / user	Is the system working?	1-3
Gate pass rate	Are gates too strict/eas.	60-80% pass
Override attempts	Do users try to bypass?	Track (no override exists.
Trades blocked by auto-gates	System preventing bad tr.	1-2 per user/week

Edge Map Engagement

Metric	Target
Users reaching 30-trade threshold	40% of active users by Day 30
Edge Map views / week	2+ per active user
Users who modify behavior after Edg.	Track via dead zone avoidance

Drawdown Engine

Metric	Target
Users setting up prop firm profiles	50% of active users
Auto-locks triggered	Track frequency
Users who "survived" a drawdown eve.	Key testimonial metric

AI Coach

Metric	Target
Post-trade debrief completion rate	60% of trades
Weekly digest open/read rate	70% of active users
AI interaction satisfaction (thumbs.	80%+ positive

Revenue Metrics

Lifetime Deal Phase (Launch - Month 3)

Metric	Formula	Target
Total lifetime deals sold	Count	100-200
Revenue from deals	Deals x \$49	\$4,900-\$9,800
Conversion rate (download -.)	Purchases / Downloads	10-15%
Revenue per download	Total revenue / Total do.	\$5-15

Post-Lifetime Phase (Month 4+) - Future Monetization

Metric	Target
Premium feature adoption	5-10% of free users
ARPU (Average Revenue Per User)	\$2-5/month equivalent
LTV (Lifetime Value)	\$50-150
CAC (Customer Acquisition Cost)	< \$5 (mostly organic)
LTV:CAC ratio	> 10:1

Tracking Stack (Free Tools)

What to Track	Tool	Cost
App analytics (retention, s.	Firebase Analytics	Free
Crash reporting	Firebase Crashlytics	Free
Revenue tracking	App Store Connect / Goog.	Free
Social media metrics	Native analytics (Twitte.	Free
Waitlist/email	Resend or Mailchimp free.	Free
User feedback	In-app survey + Google F.	Free
A/B testing (store listing)	Google Play Experiments	Free
Funnel visualization	Firebase + custom Supaba.	Free

Weekly Review Template

Every Sunday, review these numbers:

```
## Week of [DATE]

### Acquisition
- New downloads this week: _
- Waitlist signups: _
- Twitter followers gained: _
- Source breakdown: Organic % | Referral % | Paid _%

### Activation
- First trade logged (% of downloads): _%
- Gate system used at least once: _%
- Completed onboarding: _%
```

Retention

- WAU: _

- DAU (avg): _

- Day 7 retention (this cohort): _%

Revenue

- Lifetime deals sold this week: _

- Total revenue to date: \$_

- Conversion rate: _%

Product

2. _

Investor-Ready Metrics (What to Track for Pitch)

When you go to investors, they'll want:

Metric	Why Investors Care
MoM growth rate	Trajectory > absolute numbers at pre-seed
Retention curves	Product-market fit signal
Revenue per user	Monetization potential
Organic % of acquisition	Scalability without paid spend
NPS score	Word-of-mouth potential
Feature adoption rates	Product depth / stickiness

Pre-seed investors accept small numbers IF the trajectory is strong.

- 20% MoM growth = good
- 30%+ MoM growth = exceptional
- Flat or declining = red flag

Retention benchmarks sourced from Adjust Global App Trends Report (2024) and AppsFlyer State of App Marketing. Finance/trading category specifically has higher-than-average retention due to daily utility. Revenue benchmarks are based on comparable indie app launches in the trading tools niche.

SECTION 06

Outreach Templates

Copy-paste templates for cold DMs, emails, and partnership pitches.

Customize the bracketed [sections] for each recipient.

1. Trading Influencer / YouTuber Outreach

Twitter/X DM (Short)

```
Hey [Name],

Big fan of your [specific video/thread about trading discipline/psychology].

I built LocoTrader - a free app that physically BLOCKS traders from entering a trade u...

No journal after the fact. Prevention before the trade.

Would love to give you lifetime access + a look. Your audience would find the gate syste...

No strings. Just built something I think your community needs.

```

Email (Longer, for YouTubers with 10K+ subs)

Subject: Free app that stops revenge trades (not another journal)

```
Hi [Name],

I've been watching your content on [specific topic - e.g., "trading psychology" or "pr...

THE PROBLEM:
73% of retail traders lose money. Not from bad strategy - from bad execution.
Revenge trades. Dead zone trading. Position sizing errors. FOMO entries.

Every app on the market tells you what went wrong AFTER. None of them stop it from happe...
```

WHAT I BUILT:

LocoTrader has a "Gate System" - before you can log a trade, the app checks:

- Are you in your trading session?
- Have you exceeded your daily cap?
- Are you locked out from consecutive losses?
- Can you provide proof for your entry (screenshot or justification)?

If gates don't pass -> the trade is blocked. No override.

It also has:

- AI-powered Personal Edge Map (learns your patterns after 30 trades)
- Prop firm drawdown protection (auto-lock before you bust)
- Free AI coach (powered by Gemini)
- \$0/month. Free forever.

WHY I'M REACHING OUT:

I think your audience would genuinely benefit from this. I'm not asking for a paid promo...

Happy to give you:

- Lifetime premium access (free)
- A personalized demo walk-through
- Early access before public launch

No pressure. No contract. If it's not for your audience, no worries.

Built this because I blew 3 accounts before I built the system that made me profitable. ...

Would you be open to a 10-minute look?

Best,

Erick Mafole

Founder, LocoTrader

4. Prop Firm Partnership (Future - if you pursue B2B)

Email to Prop Firm Operations

Subject: Tool that reduces your challenge failure rate (= more funded traders = more revenue)

Hi [Name / Team],

I'm Erick Mafole, founder of LocoTrader - a mobile app that helps traders pass prop fi...

YOUR PROBLEM:

Most traders fail challenges due to discipline, not strategy:

- Revenge trading after a loss -> bust daily drawdown
- Overtrading -> exceed acceptable risk
- Trading during low-edge hours -> unnecessary losses

These failures mean refund requests, negative reviews, and lost repeat customers for you...

OUR SOLUTION:

LocoTrader enforces rules BEFORE traders can act:

- Gates block trades outside session windows
- Auto-lock after consecutive losses (24hr cooldown)
- Real-time drawdown tracking aligned to YOUR firm's specific limits
- Daily trade cap enforcement

THE OPPORTUNITY:

- Traders who use discipline tools pass challenges at higher rates
- Higher pass rates -> more funded traders -> more profit splits for you
- Happier traders -> better reviews -> more challenge purchases

PARTNERSHIP MODEL:

- White-label the drawdown engine with YOUR firm's branding
- Recommend LocoTrader to all challenge participants
- Revenue share on premium upgrades from your referrals
- OR: bulk licenses for your community at discounted rate

Currently serving [X] traders. [X]% report avoiding at least one account bust due to the...

Worth a 15-minute call?

Best,

Erick Mafole

Founder, LocoTrader

Twitter/X DM

Hey [Name],

I saw your tweet about [specific trading discipline struggle - e.g., "revenge trading"...

I'm building an app that would have literally blocked that trade from happening. Pre-tra...

Looking for 20 beta testers to try it before public launch. You'd get:

- Lifetime free access to everything
- Direct line to me for feedback
- Your name in the credits if you want

All I ask: use it for 2 weeks and tell me what's broken.

Interested?

6. Tech / Startup Media (Product Hunt, Indie Hackers, etc.)

Product Hunt Tagline

LocoTrader - The trading app that blocks bad trades before they happen

Product Hunt Description (Short)

73% of retail traders lose money from emotional decisions, not bad strategy. LocoTrader ...

Indie Hackers Post

Title: I built a trading app that BLOCKS bad trades (not another journal)

Hey IH ?

Solo founder from Dar es Salaam, Tanzania. I trade forex/indices and lost money for 18 m...

The problem wasn't my strategy. It was me.

- Revenge trading after losses
- Trading during my "dead zones" (discovered I had 23 consecutive losses between 09:00-1...
- Stacking entries (8.3% win rate vs 50% on single entries)

Every app out there is a JOURNAL - tells you what went wrong AFTER. None of them preve...

So I built LocoTrader:

- Pre-trade "gates" that block entry unless rules pass
- AI that learns your personal patterns after 30 trades
- Auto-lock after 3 consecutive losses (24hr, no override)
- Prop firm drawdown protection

- Free forever (launching with a one-time lifetime deal)

Tech: Flutter (mobile) + React (web) + Supabase + Gemini AI

Revenue model: One-time lifetime deal (\$49, limited spots)

Traction: [X] beta testers, launching in [X] weeks

Questions:

1. Would you pay for discipline enforcement (vs. journaling)?
2. One-time deal vs. subscription - which would you choose?
3. Any feedback on the positioning?

How it works:

- Gates zinakucheka: Je uko ndani ya session yako? Daily cap haujapita? Locked kutokana ...
- Ukishindwa gate moja -> trade imezuiwa. Hakuna override.
- AI inajifunza patterns zako baada ya trades 30+
- Free kabisa

Imeundwa Dar es Salaam ?? na mtu anayetrade kama wewe.

Link: [link]

Kama una maswali, nipigie DM. ?

English (for Nigerian/Ghanaian/South African groups)

Hey traders! ?

Built something different from the usual trading journals.

LocoTrader = app that BLOCKS your trade entry unless your pre-set rules pass.

- Trading outside your session? Blocked.
- Hit your daily cap? Blocked.
- 3 losses in a row? Locked for 24 hours. No override.

Plus: AI learns YOUR personal patterns (dead zones, profitable setups, behaviors killing...

It's free. One-time lifetime deal available for early adopters (\$49 then gone forever).

Built by an African trader, for traders who are tired of blowing accounts.

Who wants early access? Drop a ?

Response Handling

If someone says "Looks interesting, send more info"

Awesome! Here's a quick 2-min overview:

[Link to demo video or landing page]

Key things:

1. It's free (no subscription ever)
2. The gate system blocks trades before you enter (not a journal)
3. AI learns YOUR specific patterns after 30 trades
4. Built for prop firm traders (drawdown protection included)

Want me to add you to the early access list? Launch is in [X] weeks.

If someone says "How is this different from TradeZella/TraderSync?"

Great question. In one sentence:

They tell you what went wrong AFTER you lost money.
We BLOCK the trade BEFORE you lose money.

Specifically:

- TradeZella/TraderSync = reactive journaling (\$35-99/mo)
- LocoTrader = proactive enforcement (\$0/mo)

Same category, completely different approach. Like the difference between a dashcam (rec...

If someone says "Why is it free? What's the catch?"

Honest answer: I built it for myself first. I was losing money and needed enforcement, n...

The one-time lifetime deal (\$49) funds continued development. After those spots fill, th...

No data selling. No ads. No premium paywall for basic features. Open to questions if you...

SECTION 07

Social Media Strategy

Solo founder playbook: Maximum impact with 1-2 posts/week

Primary platform: Twitter/X (where trading community lives)

Platform Priority

Platform	Priority	Role	Time Investment
Twitter/X	? Primary	Authority, audienc.	30 min/day
Instagram	? Secondary	Visual data drops,.	15 min/day, 2-3x/w.
TikTok	? Tertiary	Short-form video (.)	Batch record 1x/we.
Reddit	Tactical	Launch spikes, com.	2-3 posts/month
YouTube	Long-term	Deep content, SEO .	When ready
WhatsApp/Telegram	Regional	Africa-first commu.	Organic sharing

Twitter/X Strategy (Primary Platform)

Why Twitter/X First

- Prop firm community is MASSIVE on Twitter/X
- "FinTwit" and "Forex Twitter" are established subcultures
- Threading format perfect for data storytelling
- Viral potential for provocative trading takes
- Direct access to influencers and potential users

Profile Setup

Display Name: Erick | LocoTrader ??

Bio (160 chars):

Building the trading app that blocks bad trades before they happen. 572 trades. Real dat...

Pinned Tweet (update per phase):

- Pre-launch: "I tracked 572 trades. Here's why I was losing with a winning strategy. [Thread]"
- Launch: "LocoTrader is LIVE. Blocks bad trades before they happen. Free. [Link]"
- Growth: Best-performing thread or testimonial

Link: Landing page / waitlist / app store

Content Mix

Type	Frequency	Format	Example
Data Drops	1/week	Thread or visual	"23 consecutive lo.
Pain Points	1/week	Single tweet or sh.	"You don't need an.
Product Teasers	1/2 weeks	Screenshot or video	"Here's the gate s.
Engagement	3-5/week	Replies, QTs, polls	Respond to others'.
Building in Public	1/2 weeks	Update tweet	"Week 8 of buildin.

Voice on Twitter/X

DO:

- Start tweets with a number or provocative statement
- Use "you" directly - make it personal
- Include specific data (not vague claims)
- Be contrarian ("Your trading journal is making you WORSE")
- Show vulnerability (share your own losses)

DON'T:

- Use emojis excessively (1-2 max per tweet)
- Thread everything (most tweets should stand alone)
- Post generic motivation ("Grind harder! ?")
- Pitch in every tweet (80% value, 20% product)
- Use trading clichés ("pips don't lie", "trust the process")

Tweet Templates

Data Drop Template:

I [action] for [timeframe].

Here's what I found:

- [Specific stat]
- [Specific stat]
- [Specific stat]

The conclusion: [Insight]

[Visual/screenshot if available]

Pain Point Template:

[Provocative statement that traders relate to]

But here's the thing no one tells you:

[Insight that reframes the problem]

The fix isn't [common advice]. It's [your solution concept].

Product Teaser Template:

[Problem setup - 1 line]

So I built [feature]:

[Screenshot or explanation]

[Result it produces]

Coming soon. / Now live. [Link if applicable]

Growth Tactics

1. Quote-tweet prop firm fail stories with data context
 - Someone shares "Failed my FTMO challenge" -> you respond with relevant data point + subtle positioning
2. Reply to large trading accounts with value-add comments
 - Not "nice post!" but actual insight from your data
3. Create recurring series
 - "Dead Zone of the Week" - share a new time-based insight every Friday
 - "Gate Blocked" - share what the gate system prevented (your own trades or beta testers')
4. Engagement farming (ethical)
 - Polls: "What kills your trading more? ? Revenge trades | ? Overtrading | ? Wrong timing"
 - Questions: "What time do you ALWAYS lose money? Be specific."

Instagram Strategy (Secondary)

Content Format Focus

- Carousels (80%): Data insights, before/after, step-by-step
- Reels (15%): Short product demos, data reveals
- Stories (5%): Behind-the-scenes, polls, Q&A

Bio

? The app that blocks bad trades before they happen
? Built from 572 real trades
? Free forever | Pre-trade gates + AI

Carousel Templates

Template 1: "The Data Says..."

- Slide 1: Bold statement (hook) - "Stacking entries? Your win rate is probably 8%."
- Slide 2: The data (chart/visual)
- Slide 3: What this means for your trading
- Slide 4: What to do about it
- Slide 5: CTA - "LocoTrader blocks stacking automatically. Link in bio."

Template 2: "Competitor Comparison"

- Slide 1: "TradeZella vs. LocoTrader"
- Slide 2: What they do (reactive journal)
- Slide 3: What we do (proactive enforcement)
- Slide 4: Price comparison (\$99/mo vs. \$0)
- Slide 5: "Your call."

Template 3: "Before/After"

- Slide 1: "Before LocoTrader" (chaotic trading)
- Slide 2-3: Specific problems with data
- Slide 4: "After LocoTrader" (disciplined trading)
- Slide 5-6: Same metrics improved
- Slide 7: CTA

Hashtag Strategy (Instagram)

Always use (5-7):

#TradingDiscipline #ForexTrader #PropFirm #TradingPsychology #RiskManagement #LocoTrader...

Rotate (pick 5-8 additional):

#FTMO #FundedTrader #ForexLifestyle #DayTrader #SwingTrading #TradingJournal #ForexEduca...

TikTok Strategy (Start Month 3+)

Content Style

- Hook in first 1 second (text on screen or loud statement)
- 15-30 second videos (attention span matches)
- Face optional - screen recordings with voiceover work great for trading content

Video Ideas (Batch Record)

#	Hook	Content	Duration
1	"This app just blo.	Show gate system i.	15s
2	"I lost 23 trades .	Show time heatmap .	20s
3	"Stop using tradin.	Explain why preven.	30s
4	"Free app vs \$99/m.	Quick comparison	15s
5	"3 losses = locked.	Show auto-lock fea.	20s
6	"Your dead zone is.	Educational + prod.	30s
7	"I blew 3 accounts.	Origin story	45s
8	"POV: The app won'.	Humorous take	15s

TikTok Hashtags

#tradingtok #forextok #propfirm #tradingdiscipline #daytrader #tradingapp #freeapp #fyp

Reddit Strategy (Tactical)

Subreddits to Target

Subreddit	Members	Approach
r/Forex	900K+	Data posts, answer questi.
r/FuturesTrading	100K+	Same
r/Daytrading	1.1M+	Focus on discipline/psych.
r/PropFirm	20K+	Drawdown protection, chal.
r/algotrading	200K+	Technical architecture po.

r/SideProject	200K+	Launch announcement
r/startups	1M+	Founder story
r/EntrepreneurRideAlong	100K+	Building-in-public updates

Reddit Rules

- NEVER hard-sell on Reddit (instant ban + downvotes)
- Lead with value (data, insight, education)
- Mention product only when directly relevant or asked
- Use your personal story - Reddit loves authenticity
- Respond to every comment on your posts

Content Repurposing Workflow

1. WRITE ONE TWITTER THREAD (Tuesday)

▼

2. EXTRACT 3-4 standalone tweets (Wed-Fri engagement)

▼

3. CONVERT to Instagram carousel (same week or next)

▼

4. RECORD TikTok version (batch monthly)

▼

5. COMPILE monthly threads into blog post (SEO)

▼

6. SHARE best-performing content in WhatsApp/Telegram groups

Time investment: ~4-5 hours/week total

- Tuesday: 2 hours (write thread + schedule)
- Daily: 30 min (engage, reply, community participation)
- Saturday: 1 hour (create carousel from week's thread)

Community Building

"Discipline Leaderboard" (Future Feature)

- Weekly public leaderboard of users with 0 violations
- Shareable badge: "7-day streak | No violations | LocoTrader"
- Creates organic social sharing loop

User-Generated Content Prompts

- "Share your gate block screenshot" -> feature on main account
- "What's your worst dead zone?" -> builds community engagement
- "Before/after LocoTrader" -> testimonial content

Metrics to Track (Weekly)

Platform	Key Metrics
Twitter/X	Impressions, engagements, profile visits, f.
Instagram	Reach, saves (most important), shares, foll.
TikTok	Views, watch time, shares, follows
Reddit	Post upvotes, comment engagement, traffic t.

Benchmark Targets (First 3 Months)

Platform	Month 1	Month 2	Month 3
Twitter followers	200	400	700+
Avg tweet impressions	500	1,500	3,000+
Instagram followers	100	250	500
TikTok followers	-	-	200+ (just startin.

Crisis Management

If someone accuses you of being a scam

Pricing Gap Analysis

The gap: No competitor offers proactive enforcement at ANY price point. LocoTrader provides unique functionality AND does it for free. This is a massive positioning advantage.

Competitor response risk: Low-medium. Adding enforcement to a journal-first product requires fundamental architecture changes (it's not a feature bolt-on - it changes the entire UX flow).

Why Competitors Can't Easily Copy

1. Architectural difference: Journals are designed around POST-trade data entry. Gates require PRE-trade flow. Retrofitting is like adding a firewall to a house after it's built - possible but disruptive to existing users.
2. Business model conflict: TradeZella/TraderSync profit from MORE trade logging (engagement). Blocking trades = less engagement = conflicts with their retention metrics.
3. Brand positioning: They've positioned as "analytics tools." Repositioning as "discipline enforcement" would confuse existing users and require new marketing.

4. AI differentiation: Their AI is generic (trained on aggregate data). LocoTrader's Edge Map is personal (trained on YOUR 30+ trades). Different data model entirely.

Market Positioning Opportunities

White Space We Own

- 1. Pre-trade enforcement - NOBODY does this
- 2. Free + AI-powered - at \$0/mo, we remove the "should I pay for a journal?" friction
- 3. Africa-built - first trading discipline tool built by/for African traders
- 4. Prop-firm-specific - drawdown + cap + lock aligned to challenge rules
- 5. Privacy-first - local storage, no cloud requirement, biometric lock

Potential Future Threats

Threat	Likelihood	Our Defense
TradeZella adds "gate" feat.	Medium (12-18 months)	First-mover brand + free .
New startup copies concept	High (6-12 months)	Speed of execution, authe.
Prop firms build internal t.	Low-Medium	White-label partnership o.
Free tier of existing compe.	Medium	Our free tier is already .

Competitor Weaknesses to Exploit in Marketing

Against TradeZella (\$35-99/mo)

- "TradeZella tells you what went wrong. LocoTrader stops it from happening."
- "Pay \$99/mo to journal your losses? Or use a free app that prevents them?"
- They have no enforcement mechanism - highlight this constantly

Against TraderSync (\$22-60/mo)

- "TraderSync's motto: 'Analyze your trades.' Our motto: 'Block your bad trades.'"
- "5 accounts on their free plan? We give you unlimited accounts + an AI that actually stops you from losing."

Against Edgewonk (\$12/mo)

- "Edgewonk has a tiltmeter that MEASURES your tilt. We have an auto-lock that PREVENTS you from trading while tilted."
- "No mobile app in 2026? Your trades happen on your phone. Your discipline tool should too."

Against All

- Price: "They charge \$22-99/month. We charge \$0. Same AI. Better enforcement."
- Philosophy: "Dashcam vs. auto-brake. They record the crash. We prevent it."
- Approach: "Reactive vs. Proactive. Review vs. Prevention. Journal vs. System."

TAM / SAM / SOM

Total Addressable Market (TAM)

- Global online trading platform market: \$12.57B (2026) - Mordor Intelligence
- Retail investor segment: 69.59% = ~\$8.75B

Serviceable Addressable Market (SAM)

- Retail forex/futures traders actively using tools: est. 5-10M globally
- At \$49 one-time or equivalent \$5-10/mo value: \$300M-\$1.2B annual market for trading tools/journals
- Prop firm traders (FTMO alone: 500K+ registered users): 2-3M prop firm traders globally

Serviceable Obtainable Market (SOM) - Year 1

- Target: 2,000-5,000 active users
- At 10% conversion to lifetime deal (\$49): 200-500 sales
- Year 1 revenue target: \$10,000-\$25,000

TAM/SAM sources: Mordor Intelligence (2026), FTMO public user stats, prop firm industry estimates. SOM is conservative estimate for solo founder organic launch.

Strategic Recommendations

1. Never compete on journaling features - you'll lose to TradeZella's 500+ broker integrations and massive team
2. Own "pre-trade enforcement" as a category - be the first and loudest voice
3. Price as a wedge - free removes all friction; competitors can't match without destroying their revenue
4. Target prop firm traders specifically - they have the most pain (challenge failures), the most urgency (money on the line), and the tightest community (word spreads fast)
5. Leverage Africa-first angle - untapped market, authentic story, growing rapidly, no competition

SECTION 09

Pricing Strategy

Analysis of current model + recommendations for sustainable monetization

Current Model Assessment

Current offer: \$49 one-time lifetime deal (limited spots, then gone forever)

Market Context

Competitor	Model	Annual Cost
TradeZella Essential	Monthly subscription	\$420/year
TradeZella Ultra	Monthly subscription	\$1,188/year
TraderSync Pro	Monthly subscription	\$270/year
TraderSync Elite	Monthly subscription	\$720/year
Edgewonk	16-month subscription	\$148/16mo
LocoTrader	One-time lifetime	\$49 total

Your price is 3-24x cheaper than the annual cost of ANY competitor, while offering a feature (pre-trade enforcement) that NONE of them have.

One-Time Deal Strategy

Why This Works for Launch

1. Removes friction: No recurring commitment fear
2. Creates urgency: "Gone forever" = scarcity trigger
3. Funds development: Immediate cash injection without VC
4. Builds initial user base: Low price = more users = more data = better AI = better product
5. Generates testimonials: 100 paying users at launch = social proof engine

Risks of One-Time Only

Risk	Impact	Mitigation
Revenue caps out	Can't fund ongoing devel.	Plan post-deal monetizati.
No MRR for investors	Makes fundraising harder	Show growth metrics inste.
Users expect everything fre.	Resistance to future pri.	Set clear scope in purcha.
Undervalued product percept.	"If it's \$49 it can't be.	Position as "founding mem.

Recommended Pricing Tiers (Post-Lifetime Deal)

Phase 1: Lifetime Deal (Launch - Until X Spots Filled)

FOUNDING MEMBER - \$49 one-time (LIFETIME)

- All current features forever
- All future features forever
- Priority support
- "Founding Member" badge in-app
- Limited to [100-200] spots

After spots fill: DEAL IS GONE FOREVER.

Phase 2: Free + Premium (After Lifetime Deals Sell Out)

FREE TIER - \$0/month forever

??? Pre-trade gate system (3 gates)

??? Basic risk calculator

??? Trade logging (up to 50 trades/month)

??? 1 account

??? Basic analytics

??? Community support

PRO - \$9.99/month or \$79/year

??? Everything in Free

??? Unlimited gates (custom gates)

??? Personal Edge Map (AI-powered)

??? Unlimited trades

??? Up to 5 accounts

??? AI Trading Coach (Gemini)

??? Weekly AI Digest

??? Priority support

??? Encrypted backups

TRADER+ - \$19.99/month or \$149/year

??? Everything in Pro

??? Unlimited accounts

??? Advanced prop firm profiles (custom drawdown rules)

??? PDF Tear Sheet exports

??? OCR trade import (screenshot -> trade)

??? Auto-lock customization

??? Integrity log export

??? Email + in-app support

??? Beta features early access

Why These Prices

Metric	Calculation
Floor	Must be below cheapest competitor (\$12/mo E.
Ceiling	Cannot exceed \$20/mo (we position on access.
Sweet spot	\$9.99/mo - psychological threshold, < cof.
Annual discount	35% off monthly (incentivize commitment)
LTV at \$9.99/mo	If avg user stays 8 months -> \$80 LTV
LTV at \$19.99/mo	If avg user stays 8 months -> \$160 LTV

Pricing Psychology

- \$49 lifetime < 2 months of cheapest competitor - makes lifetime feel like steal
- \$9.99/mo = "less than 1 losing trade" - frame against cost of NOT having discipline
- Free tier must be genuinely useful - gates are the hook, Edge Map is the upgrade trigger
- Annual plan saves > 1 month - clear incentive

Revenue Projections (Conservative)

Scenario 1: Lifetime Deals Only (Bootstrap)

Metric	Low	Mid	High
Lifetime deals sold	100	200	500
Price per deal	\$49	\$49	\$49
Total revenue	\$4,900	\$9,800	\$24,500
Timeline	3 months	6 months	12 months

Scenario 2: Lifetime + Subscription (Year 1)

Quarter	Lifetime Sales	Subscription Adds	Quarterly Revenue
Q1 (Launch)	100 x \$49	0 (lifetime only)	\$4,900
Q2	50 x \$49	50 x \$9.99/mo x 3mo	\$2,450 + \$1,499 = .
Q3	0 (sold out)	150 x \$9.99/mo x 3.	\$4,496
Q4	0	300 x \$9.99/mo x 3.	\$8,991
Year 1 Total			\$22,336

Scenario 3: Aggressive Growth (With Marketing Spend)

Month	MAU	Paid Users (5%)	MRR	Revenue
1	300	15 + lifetime	-	\$4,900 (lifeti.
3	800	40	\$400	\$1,200
6	2,000	100	\$999	\$2,997
9	4,000	200	\$1,998	\$5,994
12	7,000	350	\$3,497	\$10,490
Year 1 Total				~\$25,000-30,000

Conversion Optimization

Free -> Pro Upgrade Triggers

Trigger	When It Fires	Message
30 trades reached	Edge Map would unlock	"Your Edge Map is ready. .
3rd account attempted	Free tier limit hit	"Pro unlocks 5 accounts. .
Gate customization attempted	User tries to add custom.	"Custom gates are a Pro f.
AI coach request	User taps coach	"Your AI coach has insigh.
Month 2	Time-based	"You've logged 45 trades .

Reducing Churn (Once Subscriptions Exist)

Strategy	Implementation
Annual lock-in discount	35% cheaper than monthly
Streak rewards	"90 days of discipline. Here's a free month.
Data hostage (ethical)	"Your Edge Map has 6 months of insights. Do.
Community features	Pro users get access to private Discord/com.
Feature drip	Release new Pro features monthly to maintai.

Competitive Pricing Positioning

Value Messaging

"TradeZella charges \$99/mo for a journal that records your losses.
LocoTrader Pro costs \$9.99/mo and prevents those losses from happening.

That's \$89/month you keep in your trading account."

Price Anchoring (On Pricing Page)

What discipline costs WITHOUT LocoTrader:

- Average revenge trade loss: \$200-500
- Average prop firm challenge re-purchase: \$300-600
- Average monthly subscription to journal app: \$35-99

What LocoTrader Pro costs:

- \$9.99/month = 1 trade you didn't lose

ROI: 1 saved trade per month = infinite ROI on \$9.99.

One-Time Deal Execution Plan

Urgency Mechanics

1. Counter on website: "47 of 100 spots remaining"
2. Email to waitlist: Notify when 50% sold, 25% remaining, last 10
3. Social proof: "Just sold spot #73. [Username] joined from [Country]."

4. Deadline: If spots don't sell fast enough, add time pressure ("Price goes away [date]")

What Lifetime Members Get (Be Crystal Clear)

FOUNDING MEMBER LIFETIME ACCESS - \$49

YOU GET:

[OK] Every feature available today

[OK] Every feature we build in the future

[OK] Pre-trade gate system (unlimited)

[OK] Personal Edge Map (AI-powered)

[OK] Prop firm drawdown engine

[OK] AI Trading Coach

[OK] Multi-account (unlimited)

[OK] Encrypted backups

[OK] PDF Tear Sheet exports

[OK] Priority support forever

[OK] "Founding Member" badge

YOU DON'T NEED TO:

[X] Pay monthly

[X] Pay annually

[X] Pay ever again

THIS IS NOT RENEWABLE. When spots are gone, this offer ceases to exist.

Long-Term Monetization Ideas (Year 2+)

Revenue Stream	Model	Potential
Subscription tiers	\$9.99-19.99/mo	Primary revenue
Prop firm partnerships	Revenue share on referra.	\$1-5 per referred user
White-label licensing	\$X,000/year per firm	High-value B2B
PDF tear sheet (per export)	\$2-5 per PDF	Micro-transaction
Premium AI features	Pay-per-query above free.	Usage-based
Community/masterclass	\$29-99/month	Premium content + account.
Accountability partner matc.	Premium feature	Community-driven

Pricing recommendations based on competitive analysis of TradeZella (\$35-99/mo, 100K+ users), TraderSync (\$22-60/mo), and Edgewonk (\$12/mo equivalent). Mobile app pricing psychology research suggests \$9.99 as optimal subscription price for productivity/finance apps (below psychological \$10 threshold). Conversion rate benchmarks: Freemium finance apps typically see 2-5% free-to-paid conversion (Source: RevenueCat State of

Subscription Apps 2024).

SECTION 10

Landing Page Copy

Conversion-optimized copy blocks for the marketing website

Structure: Hero -> Problem -> Solution -> Features -> Proof -> Pricing -> CTA

Section 1: Hero

Headline (H1)

The Only Trading App That Blocks Bad Trades Before They Happen.

Sub-headline

Pre-trade gates. AI-powered edge detection. Prop firm protection.
Free forever. Built by a trader who blew 3 accounts.

CTA Button

Get Lifetime Access - \$49 (Limited Spots)

Micro-copy below button

One-time payment. No subscription. When spots fill, this offer disappears forever.

Section 2: Problem Statement

Header

Your Strategy Isn't the Problem. You Are.

Body

73% of retail traders lose money.

Not because they don't know support and resistance.

Not because they picked the wrong indicator.

Not because the market is "manipulated."

Because they:

- Revenge trade after a loss
- Trade during personal dead zones
- Ignore their own position sizing rules
- Stack entries when they shouldn't
- Keep trading after hitting their loss limit

You KNOW what you're supposed to do. You just can't stop yourself.

Every journal app on the market tells you what went wrong - AFTER you've lost the mone...

What if an app stopped you BEFORE the trade?

Section 3: Solution Introduction

Header

Meet LocoTrader: Pre-Trade Enforcement.

Body

Before you can enter a single trade, LocoTrader checks your rules.

If you pass -> trade allowed.

If you fail -> trade blocked. No override. No negotiation.

It's not a journal. It's not a dashboard. It's not another indicator.

It's the risk manager you wish you had - except it's on your phone, it's powered by AI, and it actually says NO.

Section 4: Feature Blocks

Feature 1: Gate System

? PRE-TRADE GATES

Before every trade, gates check:

- ? Are you in your session window?
- ? Have you hit your daily trade cap?
- ? Are you locked from consecutive losses?
- ? Can you provide proof for this entry?

All green -> trade allowed.

One red -> BLOCKED.

No willpower required. The system decides.

Feature 2: Personal Edge Map

? YOUR PERSONAL EDGE MAP

After 30 trades, the AI reveals:

- Which pairs make you money (and which bleed you)
- Your prime time windows vs. dead zones
- Day-of-week performance patterns
- The exact behaviors killing your edge

Real example: One trader discovered 23 consecutive losses between 09:00-10:30. Avoided that window -> immediately profitable.

This isn't generic advice. It's YOUR data. YOUR patterns. YOUR edge.

Feature 3: Prop Firm Protection

[!] PROP FIRM DRAWDOWN ENGINE

Built for FTM0, MyForexFunds, Topstep, and every challenge account:

- Real-time tracking: daily loss + trailing drawdown
- Color-coded: Green -> Yellow (40%) -> Red (70%)
- Auto-lock before you bust (not after)
- Weekly R-unit budget with hard stop
- Daily trade cap: 1, 2, 3, or 5 max

Your firm won't tell you you're about to fail.

LocoTrader will. Then it locks you out.

Feature 4: Auto-Lock

? 3 CONSECUTIVE LOSSES = 24-HOUR LOCK

No override. No "just one more trade." No negotiation.

When you're tilting, you can't think clearly.
So the app thinks for you: STOP.

Come back tomorrow. With a clear head.
The market will still be there.

Feature 5: AI Coach

? FREE AI TRADING COACH

Powered by Gemini AI - not a \$99/month subscription.

- Post-trade debrief after every trade
- Weekly digest every Sunday (win rate, worst habit, one focus for next week)
- Personalized drills based on YOUR data

Other apps charge \$35-99/mo for AI features.
We include it free.

Feature 6: Risk Calculator

? PERFECT LOT SIZE. EVERY TIME.

- Set your risk cap (\$125 or custom)
- Enter your stop-loss distance
- App calculates exact lot size
- Enforces minimum 1:2 reward-to-risk
- Validates stacking (combined risk <= limit)

No more mental math. No more fat-finger entries.
No more "I'll just use a bigger lot this time."

Section 5: Comparison

Header

Journal Apps vs. LocoTrader

Table

Journal Apps (\$22-99/mo) LocoTrader (\$0/mo)
- ----- -----
When it helps After you lose money Before you lose money
Approach Records your mistakes Prevents your mistakes
Enforcement Zero (you can ignore everything) Hard (gates block entry)
AI Generic insights (\$99/mo) Personal patterns (free)
Philosophy "Review and improve" "Block and protect"
Analogy Dashcam (records crash) Auto-brake (prevents crash)

Section 6: Data Proof

Header

572 Trades. 18 Months. Real Data.

Body

I didn't build this from theory. I built it from failure.

My actual numbers before building LocoTrader:

- 32.4% win rate with 2.71 R:R -> should be profitable
- But I was bleeding money. Why?

The data revealed:

- Stacking entries: 8.3% win rate (vs. 50% single entry)
- Dead zone 09:00-10:30: 23 consecutive losses
- EURUSD: 25% overall WR, but 54.5% on sells only
- Thursday/Monday + sells + single entry + 13:00-16:30 = 44.4% WR

After building the system that enforces these insights:

I stopped losing.

Now it's an app. For you. For free.

Section 7: Pricing / CTA

Header

One Price. One Time. Then Gone Forever.

Pricing Block

FOUNDING MEMBER LIFETIME ACCESS

\$49

One-time payment

[OK] Every feature. Forever.

[OK] Pre-trade gates (unlimited)

[OK] Personal Edge Map (AI)

[OK] Prop firm drawdown engine

[OK] AI Trading Coach

[OK] Multi-account (unlimited)

[OK] All future features included

[OK] Priority support

[X] No monthly fee

[X] No annual renewal

[X] No credit card on file

[X] of [100] spots remaining.

When they're gone, this price ceases to exist.

[GET LIFETIME ACCESS ->]

Below Pricing

"But why is it so cheap?"

Because I built it for myself first.

Because trading tools shouldn't cost more than a losing trade.

Because I'd rather have 200 lifetime users who help me improve the product than 0 users paying \$99/mo to an app that doesn't stop them from losing.

The lifetime deal funds development. After that, core features stay free.

That's the deal. Take it or don't.

Section 8: FAQ

Q: Is this really free?

A: The core app is free forever. The \$49 lifetime deal gives you everything (including future features). After lifetime spots fill, free tier stays + optional paid tier for advanced features.

Q: How is this different from TradeZella / TraderSync?

A: They're journals - they record what went wrong after the trade.
We're enforcement - we block the trade before it happens.
Same category, completely different approach.

Q: Do I need to connect my broker?

A: No. LocoTrader doesn't connect to brokers or execute trades.
You log trades manually (or via screenshot OCR).
The enforcement happens at the decision layer, not execution.

Q: What if I want to override a gate?

A: You can't. That's the point. If you could override it, you would.
And you'd lose money. The system protects you from yourself.

Q: Will it work for my prop firm?

A: Yes. Configure your firm's specific drawdown rules, daily loss limits, and trade caps. Works with FTMO, Topstep, MyForexFunds, and any other firm.

Q: Is my data safe?

A: Data is stored locally on your device (encrypted). No cloud required.
Optional encrypted backups to your own storage. Biometric lock on app.
We don't sell data. We don't have access to your trading account.

Q: What markets does it support?

A: Forex, indices (NQ100, US30, etc.), gold (XAUUSD), crypto, stocks.
Any instrument with a price and stop-loss works.

Q: I'm in Africa / SE Asia / emerging market. Will it work?

A: Built in Dar es Salaam, Tanzania. Works everywhere with a smartphone.
No special infrastructure needed. Offline-first - syncs when connected.

Section 9: Footer CTA

Final Push

Your next revenge trade is coming.

You know it. I know it.

The question is: will something stop you this time?

Conversion Optimization Notes

1. Above the fold: Hero + CTA visible without scrolling
2. Social proof: Add download counter + rating once available
3. Urgency: Live counter of remaining lifetime spots
4. Trust signals: "Data stored on device" + "No broker access needed" + "Open source [if applicable]"
5. Mobile-optimized: 60%+ visitors will be on mobile (traders)
6. Speed: < 3 second load time (trading audience is impatient)
7. Exit intent popup: "Before you go - 73% of traders lose from discipline. Don't be the 73%."
