Content Calendar

12-week content plan optimized for solo founder output

Prepared: July 2026
Founder: Erick Mafole

Status: Confidential
Location: Dar es Salaam, Tanzania

Designed for solo founder: 1-2 posts per week across Twitter/X + 1 platform

Strategy: Build authority through raw data + relatable trading pain points

Content Pillars

Pillar	% of Content	Purpose
? Pain Points	30%	Hook attention, show you .
? Data Drops	25%	Prove credibility with re.
?? Product Teasers	20%	Show features solving rea.
? Mindset/Education	15%	Position as authority, sh.
? Community/Social Proof	10%	Testimonials, milestones,.

Pre-Launch Phase (Weeks 1-6): Build Audience Before Product

Week 1: "The Problem"

Post 1 (Twitter/X - Thread)

Title: "I tracked 572 trades over 18 months. Here's why I was losing even with a winning strategy."

Hook: "My win rate was 32.4%. My R:R was 2.71. I was PROFITABLE on paper. But my account was bleeding."

Thread reveals: stacking (8.3% WR vs 50% single), dead zones (23 consecutive losses 09:00-10:30), FOMO entries

CTA: "I built an app that would have saved me \$X. More soon."

Post 2 (Twitter/X - Single tweet)

"73% of retail traders lose money.

It's not because of bad strategy.

It's because no one is stopping you from revenge trading at 2 AM.

What if an app physically BLOCKED you from entering a bad trade?"

Week 2: "Dead Zones"

Post 1 (Twitter/X - Data visual)

"I had a 0% win rate between 09:00-10:30 for 3 months straight.

>

23 consecutive losses.

>

I didn't notice until I let the data speak.

>

[Screenshot of time-based P/L chart]

>

Everyone has dead zones. Do you know yours?"

Post 2 (Twitter/X or Instagram)

"Things that don't work:

[X] 'I'll just be more disciplined'

[X] 'I'll journal more consistently'

[X] 'I'll meditate before trading'

>

Things that work:

[OK] An app that literally won't let you trade during your dead zone

>

Building this."

Week 3: "Stacking Kills"

Post 1 (Twitter/X - Thread)

"Stacking entries killed my edge. The data:

>

Single entry: 50% win rate -> profitable

Stacked entries: 8.3% win rate -> account destroyer

>

Same strategy. Same pairs. Same times.

The ONLY difference was stacking.

>

Here's 18 months of proof: [data visual]"

Post 2 (Twitter/X)

"Your trading journal tells you stacking is bad.

>

After you've already lost \$500.

>

What if your app BLOCKED the 2nd entry until you typed WHY you're adding?

>

That's what I'm building. Pre-trade enforcement."

Week 4: "The Gate System" (Product Reveal)

Post 1 (Twitter/X - Video/GIF)

"Building in public: Here's how the Gate System works.

>

Before you can log a trade:

1. [OK] Session window check

2. [OK] Daily cap not exceeded

3. [X] Account locked (3 consecutive losses)

>

Result: TRADE BLOCKED.

>

No willpower needed. The system says no.

>

[Screen recording of gate system]"

Post 2 (Twitter/X)

"Every trading app on the market:

? 'Log your trade'

? 'Review your mistakes'

? 'Do better next time'

>

LocoTrader:

? 'You can't trade right now. Here's why.'

>

Prevention > Cure."

Week 5: "Prop Firm Pain"

Post 1 (Twitter/X - Thread)

■ "How prop firm challenges actually fail:
>
■ Day 1-3: Cautious, follow rules [OK]
■ Day 4-7: Small winners, confidence grows
■ Day 8: First loss, slightly bigger position
■ Day 9: Revenge trade, break daily drawdown
■ Day 10: Challenge over.
>
■ It's ALWAYS the same pattern.
>
■ What if your app auto-locked your account at 70% of max drawdown?
>
■ That's built. Coming soon."

Post 2 (Twitter/X)

■ "FTMO max daily loss: 5%
■ MyForexFunds max daily loss: 5%
■ Topstep max daily loss: varies
>
■ LocoTrader tracks ALL of them.
■ Warns you at 40% (yellow).
■ Warns you at 70% (red).
■ LOCKS you before you hit the limit.
>
■ Free. No subscription."

Week 6: "Waitlist / Early Access Push"

Post 1 (Twitter/X - Thread)

■ "I'm launching LocoTrader in [X] weeks.
>
■ Here's what's included in the lifetime deal:
■ - Pre-trade gate system (blocks bad entries)
■ - Personal Edge Map (AI learns YOUR patterns)

- Prop firm drawdown protection

- AI coach (free, powered by Gemini)

- Risk calculator with enforcement

- Multi-account support

>

One-time payment. Then it's gone forever.

>

[Link to waitlist]"

Post 2 (All platforms)

"Early access is open.

[X] spots at the lifetime price.

Once they're gone -> gone forever.

>

[Link]"

Launch Phase (Weeks 7-9): Drive Downloads

Week 7: Launch Week

Post 1 - Launch Day (All platforms)

"LocoTrader is LIVE. ?

>

The only trading app that blocks bad trades before they happen.

>

[OK] Pre-trade gates

[OK] AI-powered edge detection

[OK] Prop firm drawdown protection

[OK] Free forever

>

Lifetime deal: \$49. Limited spots.

When they're gone, they're gone.

>

[App Store link] [Google Play link]"

Post 2 - Day 2-3 (Social proof request)

"If you downloaded LocoTrader yesterday:

- >
- 1. Tell me what gate blocked your first trade
 - 2. Screenshot it
 - 3. I'll feature you
- >
- The best stories get lifetime premium free."
-

Week 8: "First Results"

Post 1 (Twitter/X)

- "Day 7 of LocoTrader being live:
- >
- [X] downloads
 - [X] trades blocked by gates
 - [X] accounts saved from bust
 - Most common gate triggered: [data]
- >
- The system works. Building in public."

Post 2 (Twitter/X)

- "First DM from a user:
- >
- 'The app stopped me from revenge trading after 2 losses. I would have blown my challenge.'
- >
- This is why I built it.
- >
- [screenshot with permission]"
-

Week 9: "Why It's Free"

Post 1 (Twitter/X - Thread)

- "People keep asking: 'Why is LocoTrader free when competitors charge \$99/mo?'
- >
- Here's the honest answer:
- >
- 1. I built this for MYSELF first
 - 2. Trading apps shouldn't cost more than your account can afford
-

3. If you're losing money on bad trades, paying \$99/mo for a journal that DOESN'T stop the trades is insane

4. The lifetime deal funds development. After that, free forever.

>

That's it. No catch."

Growth Phase (Weeks 10-12): Retention + Referral

Week 10: "Edge Map Reveals"

Post 1 (Twitter/X - Thread)

"After [X] users have logged 30+ trades, here's what the Edge Map is revealing:

>

Most common dead zone: [time]

Most common unprofitable behavior: [stacking/FOMO/etc]

Average win rate improvement after avoiding dead zones: [X]%

>

The data speaks."

Week 11: "Before/After"

Post 1 (Twitter/X)

"Before LocoTrader:

- [X] trades/day (overtrading)

- [X]% win rate

- Revenge traded 3x/week

>

After 30 days with LocoTrader:

- [X] trades/day (capped)

- [X]% win rate

- 0 revenge trades (gates blocked them)

>

[User testimony with permission]"

Week 12: "Referral Push"

Post 1 (Twitter/X)

■ "For every trader you refer to LocoTrader:
>
■ You get [reward].
■ They get [reward].
>
■ Because the best marketing for a discipline app is a trader who stopped losing."

Posting Schedule

Day	Platform	Content Type
Tuesday	Twitter/X	Primary post (thread or d.
Thursday or Friday	Twitter/X + 1 other	Supporting post (shorter,.

Best Times to Post (Trading Community)

- Twitter/X: 7:00-8:00 AM EST (pre-market), 4:00-5:00 PM EST (post-market review)
- Instagram: 11:00 AM - 1:00 PM EST (lunch break scrolling)
- TikTok: 7:00-9:00 PM EST (evening content consumption)

Source: General social media engagement data for finance/trading niche - optimize once you have analytics.

Content Repurposing Strategy (Maximize 1-2 posts/week)

1. Write one Twitter thread ->
2. Extract 3-4 tweets from it for the rest of the week ->
3. Turn best thread into an Instagram carousel (once/month) ->
4. Compile monthly threads into a blog post (SEO) ->
5. Record yourself reading the thread -> TikTok/Reels (once you're ready for video)

Hashtag Strategy

Primary (always use 2-3)

#TradingDiscipline #PropFirm #ForexTrading

Rotating

#FTMO #TradingPsychology #RiskManagement #TradingJournal
#ForexLifestyle #DayTrading #SwingTrading #PropFirmChallenge
#TradingMindset #RetailTrader #FundedTrader

Branded (build over time)

#LocoTrader #TradeYourRules #GatesPassed
