Conversion-optimized copy blocks for the marketing website

Structure: Hero -> Problem -> Solution -> Features -> Proof -> Pricing -> CTA

Section 1: Hero

Headline (H1)

The Only Trading App That Blocks Bad Trades Before They Happen.

Sub-headline

Pre-trade gates. AI-powered edge detection. Prop firm protection.
Free forever. Built by a trader who blew 3 accounts.

CTA Button

Get Lifetime Access - \$49 (Limited Spots)

Micro-copy below button

One-time payment. No subscription. When spots fill, this offer disappears forever.

Section 2: Problem Statement

Header

Your Strategy Isn't the Problem. You Are.

Body

73% of retail traders lose money.

Not because they don't know support and resistance.
Not because they picked the wrong indicator.

Not because the market is "manipulated."

Because they:

- Revenge trade after a loss
- Trade during personal dead zones
- Ignore their own position sizing rules
- Stack entries when they shouldn't
- Keep trading after hitting their loss limit

You KNOW what you're supposed to do. You just can't stop yourself.

Every journal app on the market tells you what went wrong - AFTER you've lost the mone...

What if an app stopped you BEFORE the trade?

Section 3: Solution Introduction

Header

Meet LocoTrader: Pre-Trade Enforcement.

Body

Before you can enter a single trade, LocoTrader checks your rules.

If you pass -> trade allowed.

If you fail -> trade blocked. No override. No negotiation.

It's not a journal. It's not a dashboard. It's not another indicator.

It's the risk manager you wish you had - except it's on your phone, it's powered by AI, and it actually says NO.

Section 4: Feature Blocks

Feature 1: Gate System

? PRE-TRADE GATES

Before every trade, gates check:

- ? Are you in your session window?
- ? Have you hit your daily trade cap?
- ? Are you locked from consecutive losses?
- ? Can you provide proof for this entry?

All green -> trade allowed.

One red -> BLOCKED.

No willpower required. The system decides.

Feature 2: Personal Edge Map

? YOUR PERSONAL EDGE MAP

After 30 trades, the AI reveals:

- Which pairs make you money (and which bleed you)
- Your prime time windows vs. dead zones
- Day-of-week performance patterns
- The exact behaviors killing your edge

Real example: One trader discovered 23 consecutive losses between 09:00-10:30. Avoided that window -> immediately profitable.

This isn't generic advice. It's YOUR data. YOUR patterns. YOUR edge.

Feature 3: Prop Firm Protection

[!] PROP FIRM DRAWDOWN ENGINE

Built for FTM0, MyForexFunds, Topstep, and every challenge account:

- Real-time tracking: daily loss + trailing drawdown
- Color-coded: Green -> Yellow (40%) -> Red (70%)
- Auto-lock before you bust (not after)
- Weekly R-unit budget with hard stop
- Daily trade cap: 1, 2, 3, or 5 max

Your firm won't tell you you're about to fail.

LocoTrader will. Then it locks you out.

Feature 4: Auto-Lock

? 3 CONSECUTIVE LOSSES = 24-HOUR LOCK

No override. No "just one more trade." No negotiation.

When you're tilting, you can't think clearly.
So the app thinks for you: STOP.

Come back tomorrow. With a clear head.
The market will still be there.

Feature 5: AI Coach

? FREE AI TRADING COACH

Powered by Gemini AI - not a \$99/month subscription.

- Post-trade debrief after every trade
- Weekly digest every Sunday (win rate, worst habit, one focus for next week)
- Personalized drills based on YOUR data

Other apps charge \$35-99/mo for AI features.
We include it free.

Feature 6: Risk Calculator

? PERFECT LOT SIZE. EVERY TIME.

- Set your risk cap (\$125 or custom)
- Enter your stop-loss distance
- App calculates exact lot size
- Enforces minimum 1:2 reward-to-risk
- Validates stacking (combined risk <= limit)

No more mental math. No more fat-finger entries.
No more "I'll just use a bigger lot this time."

Section 5: Comparison

Header

Journal Apps vs. LocoTrader

Table

		Journal Apps (\$22-99/mo)		LocoTrader (\$0/mo)	
	-	-----		-----	

When it helps	After you lose money	Before you lose money
Approach	Records your mistakes	Prevents your mistakes
Enforcement	Zero (you can ignore everything)	Hard (gates block entry)
AI	Generic insights (\$99/mo)	Personal patterns (free)
Philosophy	"Review and improve"	"Block and protect"
Analogy	Dashcam (records crash)	Auto-brake (prevents crash)

Section 6: Data Proof

Header

572 Trades. 18 Months. Real Data.

Body

I didn't build this from theory. I built it from failure.

My actual numbers before building LocoTrader:

- 32.4% win rate with 2.71 R:R -> should be profitable
- But I was bleeding money. Why?

The data revealed:

- Stacking entries: 8.3% win rate (vs. 50% single entry)
- Dead zone 09:00-10:30: 23 consecutive losses
- EURUSD: 25% overall WR, but 54.5% on sells only
- Thursday/Monday + sells + single entry + 13:00-16:30 = 44.4% WR

After building the system that enforces these insights:

I stopped losing.

Now it's an app. For you. For free.

Section 7: Pricing / CTA

Header

One Price. One Time. Then Gone Forever.

Pricing Block

FOUNDING MEMBER LIFETIME ACCESS

\$49

One-time payment

[OK] Every feature. Forever.

[OK] Pre-trade gates (unlimited)

[OK] Personal Edge Map (AI)

[OK] Prop firm drawdown engine

[OK] AI Trading Coach

[OK] Multi-account (unlimited)

[OK] All future features included

[OK] Priority support

[X] No monthly fee

[X] No annual renewal

[X] No credit card on file

[X] of [100] spots remaining.

When they're gone, this price ceases to exist.

[GET LIFETIME ACCESS ->]

Below Pricing

"But why is it so cheap?"

Because I built it for myself first.

Because trading tools shouldn't cost more than a losing trade.

Because I'd rather have 200 lifetime users who help me improve the product than 0 users paying \$99/mo to an app that doesn't stop them from losing.

The lifetime deal funds development. After that, core features stay free.

That's the deal. Take it or don't.

Section 8: FAQ

Q: Is this really free?

A: The core app is free forever. The \$49 lifetime deal gives you everything (including future features). After lifetime spots fill, free tier stays + optional paid tier for advanced features.

Q: How is this different from TradeZella / TraderSync?

A: They're journals - they record what went wrong after the trade.

We're enforcement - we block the trade before it happens.

Same category, completely different approach.

Q: Do I need to connect my broker?

A: No. LocoTrader doesn't connect to brokers or execute trades.

You log trades manually (or via screenshot OCR).

The enforcement happens at the decision layer, not execution.

Q: What if I want to override a gate?

A: You can't. That's the point. If you could override it, you would.

And you'd lose money. The system protects you from yourself.

Q: Will it work for my prop firm?

A: Yes. Configure your firm's specific drawdown rules, daily loss limits, and trade caps. Works with FTM0, Topstep, MyForexFunds, and any other firm.

Q: Is my data safe?

A: Data is stored locally on your device (encrypted). No cloud required.

Optional encrypted backups to your own storage. Biometric lock on app.

We don't sell data. We don't have access to your trading account.

Q: What markets does it support?

A: Forex, indices (NQ100, US30, etc.), gold (XAUUSD), crypto, stocks.

Any instrument with a price and stop-loss works.

Q: I'm in Africa / SE Asia / emerging market. Will it work?

A: Built in Dar es Salaam, Tanzania. Works everywhere with a smartphone.

No special infrastructure needed. Offline-first - syncs when connected.

Section 9: Footer CTA

Final Push

Your next revenge trade is coming.

You know it. I know it.

The question is: will something stop you this time?

Conversion Optimization Notes

1. Above the fold: Hero + CTA visible without scrolling
2. Social proof: Add download counter + rating once available
3. Urgency: Live counter of remaining lifetime spots
4. Trust signals: "Data stored on device" + "No broker access needed" + "Open source [if applicable]"
5. Mobile-optimized: 60%+ visitors will be on mobile (traders)
6. Speed: < 3 second load time (trading audience is impatient)
7. Exit intent popup: "Before you go - 73% of traders lose from discipline. Don't be the 73%."
