I've been watching your content on [specific topic - e.g., "trading psychology" or "pr...

THE PROBLEM:
73% of retail traders lose money. Not from bad strategy - from bad execution.
Revenge trades. Dead zone trading. Position sizing errors. FOMO entries.

Every app on the market tells you what went wrong AFTER. None of them stop it from happe...

WHAT I BUILT:
LocoTrader has a "Gate System" - before you can log a trade, the app checks:
- Are you in your trading session?
- Have you exceeded your daily cap?
- Are you locked out from consecutive losses?
- Can you provide proof for your entry (screenshot or justification)?

If gates don't pass -> the trade is blocked. No override.

It also has:
```

- AI-powered Personal Edge Map (learns your patterns after 30 trades)
- Prop firm drawdown protection (auto-lock before you bust)
- Free AI coach (powered by Gemini)
- \$0/month. Free forever.

WHY I'M REACHING OUT:

I think your audience would genuinely benefit from this. I'm not asking for a paid promo...

Happy to give you:

- Lifetime premium access (free)
- A personalized demo walk-through
- Early access before public launch

No pressure. No contract. If it's not for your audience, no worries.

Built this because I blew 3 accounts before I built the system that made me profitable. ...

4. Prop Firm Partnership (Future - if you pursue B2B)

Email to Prop Firm Operations

Subject: Tool that reduces your challenge failure rate (= more funded traders = more revenue)

Hi [Name / Team],

I'm Erick Mafole, founder of LocoTrader - a mobile app that helps traders pass prop fi...

YOUR PROBLEM:

Most traders fail challenges due to discipline, not strategy:

- Revenge trading after a loss -> bust daily drawdown
- Overtrading -> exceed acceptable risk
- Trading during low-edge hours -> unnecessary losses

These failures mean refund requests, negative reviews, and lost repeat customers for you...

OUR SOLUTION:

LocoTrader enforces rules BEFORE traders can act:

- Gates block trades outside session windows
- Auto-lock after consecutive losses (24hr cooldown)
- Real-time drawdown tracking aligned to YOUR firm's specific limits
- Daily trade cap enforcement

THE OPPORTUNITY:

- Traders who use discipline tools pass challenges at higher rates
- Higher pass rates -> more funded traders -> more profit splits for you
- Happier traders -> better reviews -> more challenge purchases

PARTNERSHIP MODEL:

- White-label the drawdown engine with YOUR firm's branding
- Recommend LocoTrader to all challenge participants
- Revenue share on premium upgrades from your referrals
- OR: bulk licenses for your community at discounted rate

Looking for 20 beta testers to try it before public launch. You'd get:

- Lifetime free access to everything
- Direct line to me for feedback
- Your name in the credits if you want

All I ask: use it for 2 weeks and tell me what's broken.

Interested?

So I built LocoTrader:

- Pre-trade "gates" that block entry unless rules pass
- AI that learns your personal patterns after 30 trades
- Auto-lock after 3 consecutive losses (24hr, no override)
- Prop firm drawdown protection
- Free forever (launching with a one-time lifetime deal)

Tech: Flutter (mobile) + React (web) + Supabase + Gemini AI

Revenue model: One-time lifetime deal (\$49, limited spots)

Traction: [X] beta testers, launching in [X] weeks

Questions:

1. Would you pay for discipline enforcement (vs. journaling)?
2. One-time deal vs. subscription - which would you choose?

3. Any feedback on the positioning?

Hey traders! ?

Built something different from the usual trading journals.

LocoTrader = app that BLOCKS your trade entry unless your pre-set rules pass.

- Trading outside your session? Blocked.
- Hit your daily cap? Blocked.
- 3 losses in a row? Locked for 24 hours. No override.

Plus: AI learns YOUR personal patterns (dead zones, profitable setups, behaviors killing...

If someone says "Looks interesting, send more info"

Awesome! Here's a quick 2-min overview:

[Link to demo video or landing page]

Key things:

1. It's free (no subscription ever)
2. The gate system blocks trades before you enter (not a journal)
3. AI learns YOUR specific patterns after 30 trades
4. Built for prop firm traders (drawdown protection included)

Want me to add you to the early access list? Launch is in [X] weeks.

If someone says "How is this different from TradeZella/TraderSync?"

Great question. In one sentence:

They tell you what went wrong AFTER you lost money.
We BLOCK the trade BEFORE you lose money.

Specifically:

- TradeZella/TraderSync = reactive journaling (\$35-99/mo)
- LocoTrader = proactive enforcement (\$0/mo)

Same category, completely different approach. Like the difference between a dashcam (rec...
